

LOWER UTILITY COSTS ARE BUILT INTO EVERY ENERGY STAR® LABELED HOME.

ENERGY STAR labeled homes are at least 30% more energy efficient than a standard home. With ENERGY STAR, you can be certain your new home comes with special features such as tight construction, properly installed insulation, high-performance windows, and high-efficiency heating and cooling equipment. Together, these add up to lower utility bills and a more comfortable living environment. To buy a new home that helps you and the environment, visit www.EnergyStarHomesMidwest.com.
