Want More from Your Windows?

Ask for ENERGY STAR®

LEARN MORE AT
energystar.gov

Innovation. Performance. Savings.

Save with ENERGY STAR Qualified Windows, Doors, and Skylights...

Save Money. If you are in the market for new windows, choose ENERGY STAR instead of typical replacement windows and save an additional $25 to $110 per year. See the chart below for savings in your area.

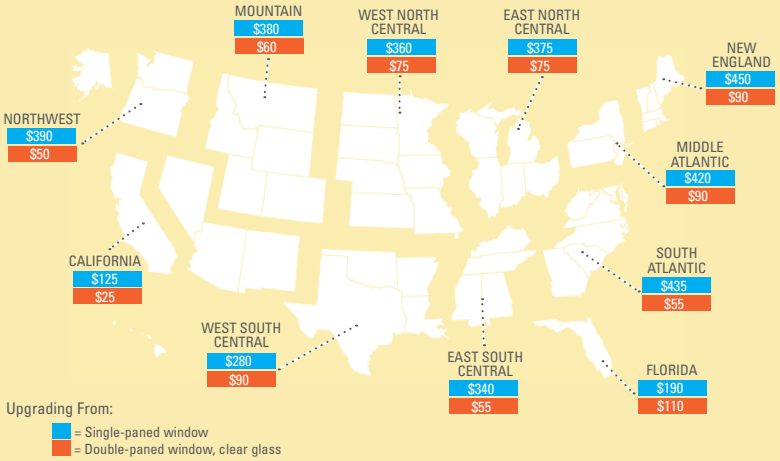
Get Comfortable. Thanks to new technology, properly installed ENERGY STAR windows help reduce cold winter drafts and block heat from the sun – keeping you more comfortable in all seasons.

Protection Never Looked so Good. Many ENERGY STAR qualified windows, doors and skylights act like sunscreen for your house, protecting your photographs, artwork, furniture, carpets and wood floors from damaging UV rays.

Buy with Confidence. Every ENERGY STAR qualified window, door and skylight is independently certified to perform at levels that meet or exceed strict energy-efficiency guidelines recommended by the U.S. Department of Energy.

Upgrade to ENERGY STAR Windows, Doors and Skylights:

Annual Savings[1]



[1] Based on a 2,000 sq. ft., single-story, detached house with 300 sq. ft. of window area, gas heat and electric air conditioning.

Purchasing Tips

- **Ask for ENERGY STAR.** If you want comfort and savings, make sure to ask for windows that have earned the ENERGY STAR.
- **Find the Window that's Right for You.** The ENERGY STAR criteria for windows, doors and skylights are tailored to four climate zones. When shopping, be sure to look for the ENERGY STAR label to ensure the window, door or skylight you purchase is qualified for the climate zone in which you live.
- **Have Windows Properly Installed.** To get the most from your windows, doors and skylights, have them installed by trained professionals according to the manufacturer's instructions.

To find out more about ENERGY STAR windows, doors and skylights and determine your climate zone, visit **www.energystar.gov/windows**.
