

Pg. 1 on the last paragraph- we want EPA to exclude half size gas and electric ovens at this time.

Pg. 3 on the 2<sup>nd</sup> note regarding ovens that provide moist heat and to reduce confusion consider moist heat ovens as combination ovens. We do agree with that.

Pg. 3 on the last paragraph- We do agree with a minimum of 5 pans for both half size and full size convection oven.

Pg. 7 last paragraph – We will decide the units with unique configuration than the standard units and if they meet the Energy Star requirements then we assign a unique model number to them.

Thank you
