

I have reviewed the documents you sent out regarding the Draft ENERGY STAR Ice Machine Specification. ICE-O-Matic fully supports both the Ice Machine Specification and the QPI form, as well as the new January 1, 2008 implementation date. However, I do have one comment: On page 1 of the Ice Machine Spec Memo, there is a reference to “Tier 1 or 2”. There is no other mention of “Tier 1 or 2” in the body of the document, so that page 1 reference does not make sense.
