

[[The Wikibon Project]]

**A Method and Process to Measure  
the Energy Efficiency of Storage Arrays**

*David Floyer CTO & Co-Founder, Wikibon  
Phoenix, 10/15/2009*

# Agenda

## Introduction

- Wikibon
- Wikibon Energy Lab
- Vendors & Technologies Measured
- Measuring the Impact of Energy Efficient Technologies on Storage
  - Measurement Method
  - Hardware Example
    - Measurements
    - Hero Report
    - Field Validation
  - Software Examples
    - Measurements
    - Hero Report
    - Field Validation
- Towards an Energy Star Program
- Conclusions, Summary & Discussion

# Agenda

## Introduction

- **Wikibon**
- **Wikibon Energy Lab**
- **Vendors & Technologies Measured**
- Measuring the Impact of Energy Efficient Technologies on Storage
  - Measurement Method
  - Hardware Example
    - Measurements
    - Hero Report
    - Field Validation
  - Software Examples
    - Measurements
    - Hero Report
    - Field Validation
- Towards an Energy Star Program
- Conclusions, Summary & Discussion

# Introduction to Wikibon (1)

- A growing community of 7,000 IT practitioners
- Goal is to provide an open source platform for practitioners to share knowledge
- Based on a Wiki (2,000+ pieces of content)
- [www.wikibon.org](http://www.wikibon.org)
