

**TMC Enterprises Comments on ENERGY STAR Program  
Requirements for Residential Light Fixtures Draft 1 Eligibility Criteria  
– Version 4.0**

I am writing you to suggest that LED based light fixtures be a product that is added to the list of items that can achieve EPA approval. As I'm sure you are aware, LED's have substantial energy savings over Fluorescents. Our company has developed a handheld product (not a simple one LED flashlight) that runs of an AC current or a DC current (rechargeable battery), and is for use in Industrial Environments.

Thank you for your time.

Best Regards,

Sean Miller
