Subject: ENERGY STAR Imaging Equipment Specification Revision Update, May 20, 2005

This message is being sent to you on behalf of EPA and DOE's ENERGY STAR® program.

Dear ENERGY STAR Imaging Equipment Stakeholder:

EPA would like to thank all stakeholders who have submitted feedback on the Final Draft Typical Electricity Consumption (TEC) Test Procedure, which was distributed on April 15, 2005. This feedback and any test data that was submitted are currently under review and consideration. Since EPA is in the process of analyzing this test data and holding meetings with stakeholders to discuss their comments, EPA has decided to delay the distribution of the Final TEC Test Procedure. This finalized document will not be distributed on May 31, 2005, as originally suggested. Stakeholders will receive additional correspondence in the near future with more information about when the finalized TEC Test Procedure will be released.

In an effort to have the ENERGY STAR Imaging Equipment specification development process be as transparent as possible, EPA asks that stakeholders please indicate whether comments submitted may be posted on the ENERGY STAR Web site at www.energystar.gov/productdevelopment. Please note that EPA will post all comments unless stakeholders specifically ask that these comments remain confidential.

Thank you again for your continuing support during the ENERGY STAR Imaging Equipment specification development process.
