Subject: Four-zone alternative

Dear Sir:

I am president of Coastal Glass Distributors LLC, a glass fabricator based in Charleston, SC. We fabricate tempered, insulating, and laminated glass for both residential and commercial construction; we fabricate both sputter-coat and pyrolytic low-e glass.

I strongly support the four-zone alternative. I believe that the advantages of the four-zone proposal (particularly the energy savings and the much higher costs to make and to fabricate sputter-coated glass) greatly outweigh the advantages of the three-zone proposal.

If I can provide further information, please don't hesitate to contact me.

Sincerely,

Jack B. Hoey, Jr.
President
Coastal Glass Distributors LLC
