Subject: Comment on Energy Star zones

Mr. Karney,

I am the President of Kaufmann Window & Door Corporation. We are a manufacturer of vinyl windows. We are located in Detroit, Michigan. We support the three zone alternative for the Energy Star window program.

Our justification for this support is the same as DOE's. The three zone method is straight forward and simple to manage. Since this is a consumer oriented scheme, it makes sense to us to make it consumer friendly.

Sincerely,

Daniel W Padilla
