Subject: Energy Star Window Program

Dear Mr. Karney:

I am writing to express my company's support for the four-zone criteria of the Energy Star Window Program. We feel this program represents the best interest of the entire nation from both performance and energy saving perspectives. We have always tried to educate our customers to the benefits of solar heat gain and we feel using only three zones ignores the personal and national benefits of those pyrolytic (heat gaining) products. From a production standpoint the sputtered coat products would cost companies like ours time, money, and additional ENERGY to fabricate.

Sincerely,

Lisa Haynes
