Subject: Re: Energy Star

Richard: Just a note to support you in your effort to reach concensus on the final Energy Star proposal. I believe that all of the technical and political positions and justifications have been presented in duplicate. Marvin's position has not changed so if you want to reference my past communications you will see that we are in support of your 3 zone proposal. The 4 zone proposal drives the 0.55 SHGC too far south.
