

## **SAVE THE DATE: TV TEST PROCEDURE WORKSHOP, JUNE 19, 2006, IN LONDON, ENGLAND**

The UK Market Transformation Programme, Australian Greenhouse Office, and U.S. EPA invite you to participate in an **International TV Test Procedure Workshop in London, England on June 19, 2006**, to be held in conjunction with the Energy Efficiency in Domestic Appliances and Lighting (EEDAL) conference. During this working session, participants will discuss and share feedback on a Draft test procedure designed to measure the power consumption of all TV technologies in active mode.

This notice is being sent to a wide range of stakeholders. Please pass this invitation onto relevant engineers, technical marketing, and QA colleagues. This session will focus solely on the Draft test procedure; *not* on potential power consumption levels or policy questions.

Preliminary information on the workshop is available at: <http://livegroup.co.uk/EEDAL>. Click on 'Side Events' located on the left navigation tool bar and scroll down to 'International TV Power Consumption Test Methodology Workshop.'

Additional details, such as a confirmed meeting time, location and agenda, will be distributed shortly, along with information on how to register for this event.

For U.S. stakeholders who are unable to attend the June 19, 2006, workshop in London, a follow-up workshop will be planned in the U.S. shortly afterwards. Details on this U.S. workshop will be distributed in the coming weeks. However, we encourage you to pass this invitation along to your European colleagues so that they can participate in the June 19, 2006, workshop.

**NOTE:** For those stakeholders also interested in attending EEDAL June 21 – 23, 2006, please be aware that there is a separate registration process and conference fee. Information on conference registration can be found at: <http://livegroup.co.uk/EEDAL>. Discounted registration for EEDAL is available until April 30, 2006.
