

ENERGY GUIDE FOR DISTILLERIES

How to use the guide to help your organization improve

The [ENERGY STAR Energy Guide for Distilleries](http://www.energystar.gov/distilleries) contains nearly 180 opportunities to save energy and money in distilling operations. To get the most out of the guide, consider the activities below. Download the guide at www.energystar.gov/distilleries.

SEND EMAIL

with link to guide to internal stakeholders including staff from operations, EHS, facilities, & sustainability.

SCHEDULE MEETING

with staff to review the guide and the top opportunities in their distilleries.

USE IN TRAINING

Make the entire guide, or select chapters, required readings when training new staff and staff in operations, EHS, facilities & sustainability.

POST ON INTRANET

or other internal company platforms for sharing resources.

SHARE WITH SUPPLIERS

and ask for their support in scoping opportunities from the guide in your distilleries.

INCORPORATE IN BMPS

Incorporate chapter checklists in organizational best management practices, shutdown plans, etc.

CONDUCT GAP ANALYSIS

Have staff identify equipment and practices being used and not being used based on chapter checklists and summary of practices found in the guide (page 8).

INFORM CAPITAL PLANNING

Review the guide during budgeting season to identify capital improvement projects.

Tell us how you used the guide or share what you did to increase efficiency by emailing energystrategy@energystar.gov.
