National Average

Most Efficient
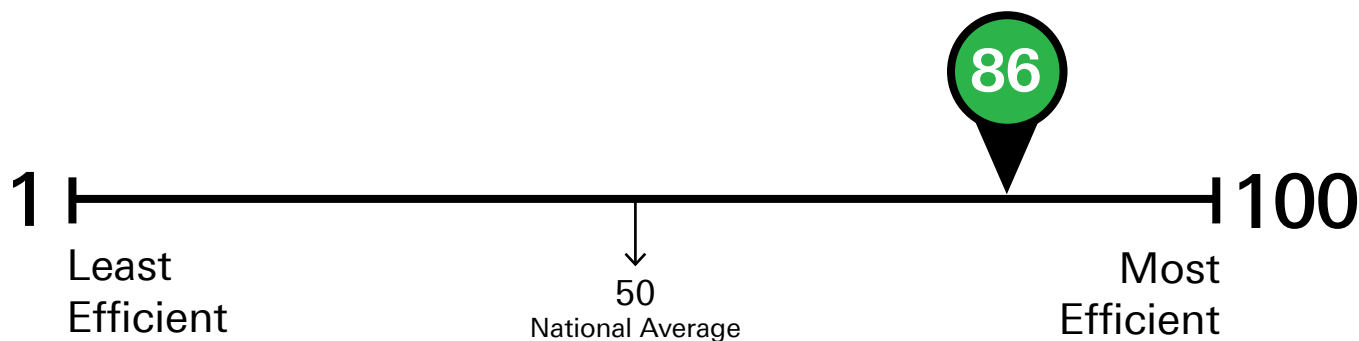

What is the ENERGY STAR Score?

The U.S. Environmental Protection Agency's ENERGY STAR Score rates commercial building's energy performance relative to similar buildings nationwide. Expressed as a number on a simple 1 – 100 scale, the score rates performance on a percentile basis: a building with a score of 50 performs better than 50% of its peers. Higher scores mean better energy efficiency, resulting in less energy use and fewer greenhouse gas emissions.
