200 1st St. SE
Cedar Rapids

RSVP to:
lisapucelik@alliantenergy.com

Iowa has emerged as one of the most successful markets for ENERGY STAR qualified homes. This widespread market penetration brings with it great challenges for the future. EPA is working with Alliant Energy, Black Hills Energy, and MidAmerican Energy to present ENERGY STAR workshops for the raters and builders who serve Iowa. These workshops will provide a forum for Iowa's rating community to discuss increasing quality assurance challenges. They will also help new builders joining ENERGY STAR to get off on the right foot.

Workshop Schedule

Rater workshop – 9am to 2:30pm

- Best practices for rating ENERGY STAR qualified homes
- Facilitated discussion on verification practices and quality enforcement
- In-field Thermal Bypass Checklist training

Homebuilder workshop – 3 to 6pm

- How to Sell ENERGY STAR Qualified Homes
- The Road Ahead: ENERGY STAR 2011 and Beyond

Generously sponsored by:
