

Host the ENERGY STAR® Heating & Cooling Quiz on Your Web Site

Instructions for Hosting

To host the ENERGY STAR Heating & Cooling Quiz on your Web site, simply insert this line of code on the appropriate page and location on your Web Site:

```
<iframe width="450" height="640" frameborder="0" scrolling="no"
src="http://www.energystar.gov/index.cfm?fuseaction=hvac_quiz.showQuestions&iframe=true" />
```

When selecting a location on your site, keep in mind that the content for the HVAQ Quiz is approximately 450 pixels wide and 640 pixels high¹. So be sure to select a page on your site that has room. Alternatively, consider dedicating a new Web page on your site to the HVAC Quiz.

You are able to host the HVAC Quiz through the use of iFrames². iFrames, or Inline Frames, allow you to insert content from another page or web site into your page.

Heating & Cooling Quiz Form

ENERGY STAR Asks:
Are you doing all you can to maintain your home's heating and cooling system?

Answer these questions to find out

HAVE YOU:

Changed your air filter in the last 3 months?	<input type="radio"/> YES <input checked="" type="radio"/> NO
Removed leaves, dirt, and other debris from around the outdoor components of your system?	<input type="radio"/> YES <input checked="" type="radio"/> NO
Installed a programmable thermostat and programmed it properly?	<input type="radio"/> YES <input checked="" type="radio"/> NO
Inspected your duct system for obvious signs of leaks and disconnects?	<input type="radio"/> YES <input checked="" type="radio"/> NO
Had your heating and cooling equipment inspected by a professional in the last year?	<input type="radio"/> YES <input checked="" type="radio"/> NO

SUBMIT

Heating & Cooling Quiz Results

EPA's ENERGY STAR Recommends

- Change your filter at least every 3 months to improve airflow and air quality
- Remove leaves and other debris from around the outdoor components to improve airflow through your system
- Seal and insulate heating and cooling ducts in unfinished areas (such as the attic, basement or crawl space). You could improve your system's efficiency by as much as 20%
- Get your system inspected by a professional contractor prior to each heating and cooling season. Maintaining your system will keep it operating efficiently

Heating and cooling accounts for as much as half of your home's energy use. With recommendations from ENERGY STAR, you can save as much as 20% annually on your energy bills. [Learn More](#)
