

When every home office is powered by equipment that has earned
the ENERGY STAR, the change will keep 219 billion pounds
of greenhouse gas emissions out of our air.

Computers, fax machines, printers. They're designed to make our lives easier, but they can also make our world a cleaner place to live. Office equipment that has earned the ENERGY STAR® requires less energy than standard models. And less energy means less air pollution. We all want our home offices to run efficiently. Now they can help the planet, too.

change.
