

What's Changed Since IECC 2006?

- Some envelope requirements more stringent
- New requirements added
 - Duct leakage pressure test leakage (unless inside conditioned space)
 - Building envelope tightness verification (whole-house pressure test or checklist/inspection)
 - Lighting efficacy limits
 - Pool controls and covers
 - Snow melt controls
- Moisture control requirements (e.g., vapor retarders) moved to IRC
- HVAC trade-offs disallowed
- A few performance path assumptions changed
