ENERGY STAR® SUMMARY
OF APPLIANCES & WATER HEATER
PROGRAMS
BY ENERGY EFFICIENCY PROGRAM SPONSORS (EEPS)

OCTOBER 2011 UPDATE

The U.S. Environmental Protection Agency (EPA) is pleased to provide the **ENERGY STAR® Summary of Appliance and Water Heater Programs** (Summary). The Summary provides an overview of the promotion programs offered by utilities and other energy efficiency program sponsors in the United States for ENERGY STAR qualified clothes washers, dishwashers, refrigerators, freezers, room air conditioners, dehumidifiers, room air cleaners and purifiers, water coolers, and residential water heaters. The Summary includes information provided by energy efficiency program sponsors and describes their program offerings in 2011-2012 and beyond.

Each ENERGY STAR residential appliance and residential water heater promotion program is summarized with a focus on incentives (e.g., mail-in rebates, recycling), marketing and consumer education efforts, program contacts, and other relevant program details. Tax incentives, where they exist, are also captured.

The Summary of Appliance and Water Heater Programs is divided into the following sections:

1. **Executive Summary**
2. **Program Budget Map, National Rebate Charts and Graphs** – Overview of promotion types for appliances and water heater programs across the United States.
3. **Tax Incentives** – A summary table of current sales tax exemptions and income tax credits or deductions available in selected states.
4. **Appliance Programs at a Glance** – A summary table of current appliance promotions organized by state.
5. **Water Heater Programs at a Glance** – A summary table of current residential water heater promotions organized by state.
6. **Program Details** – In-depth descriptions of each partner’s promotion programs, including contact information for program managers.

If you have any questions or comments about the ENERGY STAR Summary of Appliance and Water Heater Programs, please contact Nora Buehler at ICF International, at nbuehler@icfi.com or 202.862.1589.

Executive Summary

Appliances

The ENERGY STAR Summary of Appliance Programs presents information submitted by 205 energy efficiency program sponsors from across the United States. The partners have provided information about 672 individual incentive and promotion programs for ENERGY STAR appliances including clothes washers, dishwashers, dehumidifiers, refrigerators, freezers, room air conditioners, room air cleaners and purifiers, water coolers, and a variety of other equipment.

From the information submitted by energy efficiency program sponsors, the key highlights include:

Promotions by Region – The West has the greatest number of appliance promotions with 249, followed by the Midwest with 220. The Northeast, Mid-Atlantic, Southeast, and Southwest programs submitted 55, 44, 36, and 68 promotions respectively.

Promotions by Product – Out of the 672 appliance product promotions, incentives for clothes washers and refrigerators and/or freezers lead the group, representing 24 percent and 22 percent respectively. Incentives for refrigerators and freezers recycling follow closely behind (18%) followed by dishwashers (12%) and room air conditioners (11%). The remainder is comprised of dehumidifiers, room air conditioner recycling, room air cleaners and purifiers, and the “other” category comprised of various products.

Promotions by Type – The vast majority of promotions, nearly three quarters, are mail-in rebates. Partners submitted information about a few instant rebates for appliances; this may be a category to watch over the next year. Recycling incentives represent 23 percent of appliance promotions. Incentives range from \$10 to \$600, with the average and most frequent incentives between \$25 and \$50 (see chart in the next section).

Water Heaters

The ENERGY STAR Summary of Residential Water Heater Programs presents information submitted by 96 energy efficiency program sponsors across the United States. The partners have provided information about 196 individual incentive and promotion programs for ENERGY STAR water heater products including gas condensing, gas storage, tankless, heat pump, and solar.

From the information submitted by energy efficiency program sponsors, the key highlights include:

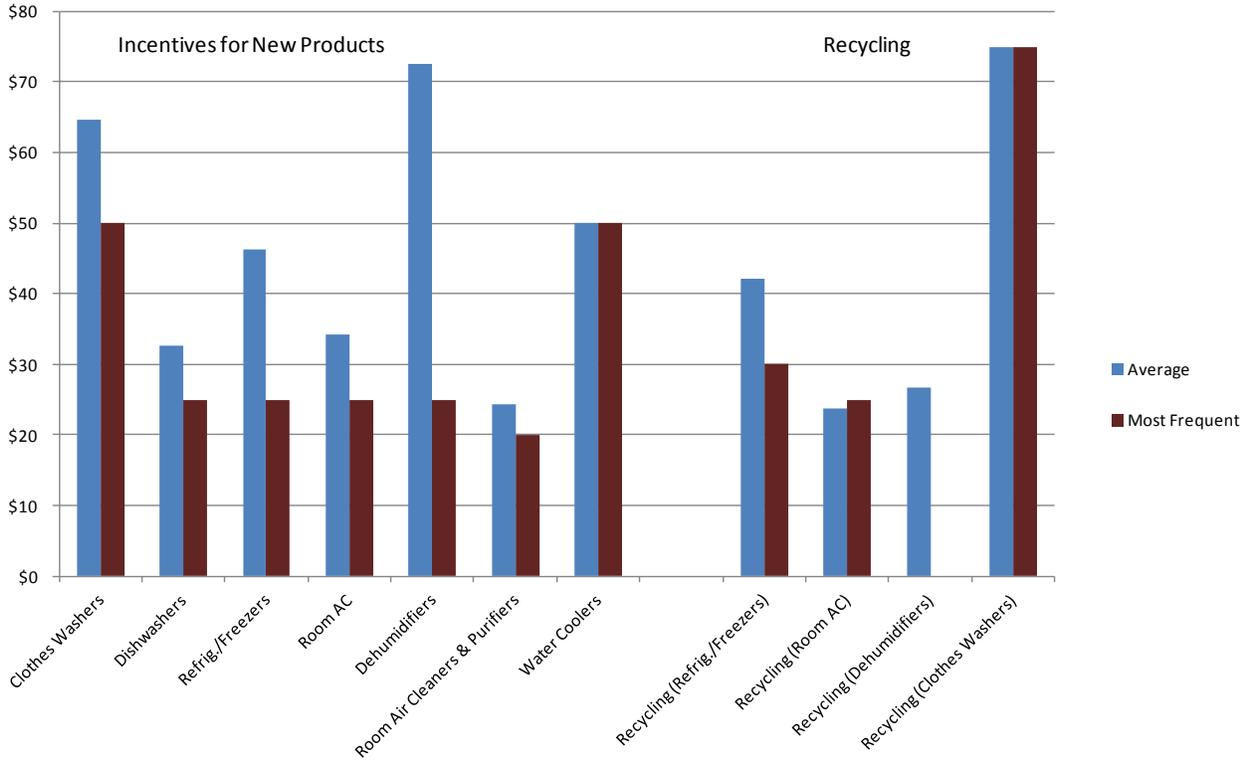

Promotions by Region – The Midwest has the greatest number of water heater promotions with 61, followed by the West and Southwest regions with 51 and 31 respectively. The Northeast, Southeast, and Mid-Atlantic programs submitted 29, 18, and 6 promotions respectively.

Promotions by Product – Natural gas storage and tankless water heaters represent the largest shares, with 28 percent and 24 percent respectively. Gas condensing and solar water heaters each account for 9 percent of the promotions whereas heat pumps represent 19 percent of the promotions. The remainder represents a variety of other technologies.

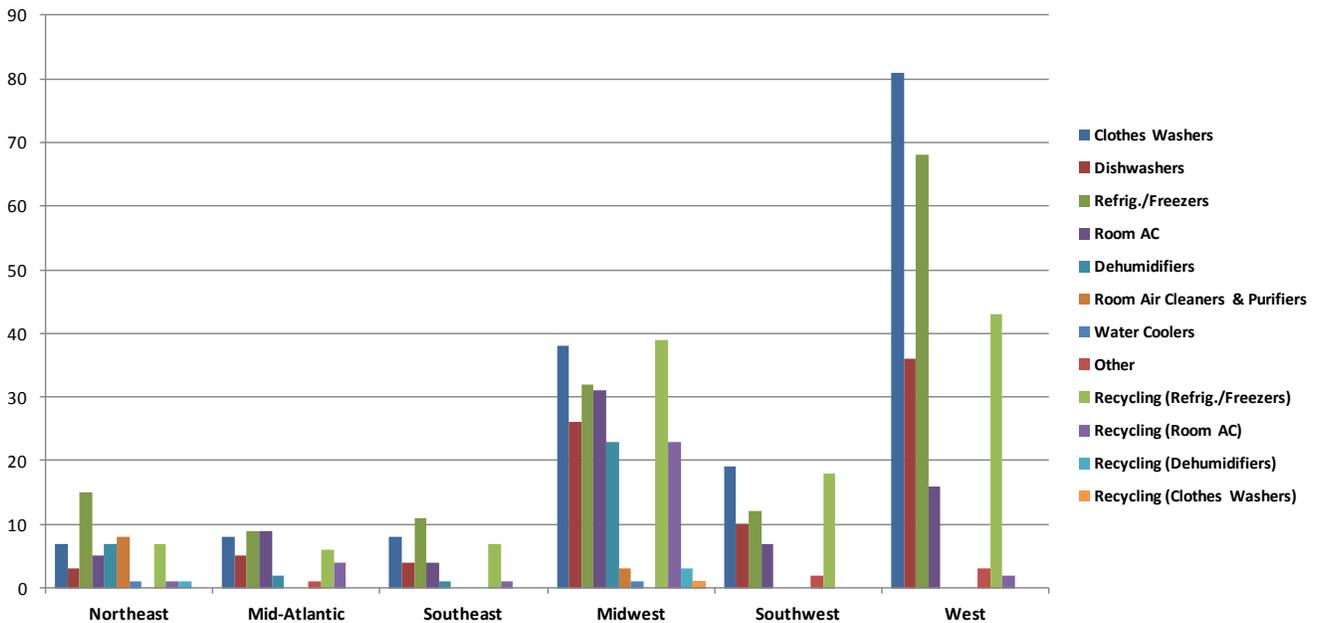

Promotions by Type – Water heater promotions often feature mail-in rebates. In fact, 188 of the 196 total promotions are mail-in rebates. Other promotion types include loan programs and mid-stream (dealer or contractor) incentives. Incentives range from \$15 (mid-stream incentive) to \$10,000 (low interest financing), with the average and most frequent incentives between \$300 and \$400 (see chart in the next section).

Other Activities: Marketing/consumer education through point-of-purchase stickers and signs, marketing handouts, customer awareness website, and, retail staff training. Program Information:</p> <ul style="list-style-type: none"> The Appliance program offers tiered rebates for a variety of appliances, including qualifying clothes washers, dishwashers and room air conditioners to help customers save energy and money, and reduce water usage. The Appliance programs' incentives are paid to the end-use customer. Clothes washer and dishwasher rebates are available to gas and electric customers and room air conditioner rebates are only available to electric customers. PG&E and greater Bay Area water agencies continue to run a cooperative rebate program offering a streamlined rebate process to customers who purchase high-efficiency clothes washers. Eligible customers earn a combined rebate for their purchase of qualifying water and energy-efficient clothes washers. Water agencies also use the tiered rebate approach on clothes washers, with their portion of the rebate amount being \$50 or \$125, depending on the water agency. Qualifying customers receive either a \$175 or \$100 rebate check.
