ENERGY STAR® SUMMARY
OF LIGHTING PROGRAMS
BY ENERGY EFFICIENCY PROGRAM SPONSORS (EEPS)

AUGUST 2013 UPDATE

The U.S. Environmental Protection Agency (EPA) is pleased to provide the **2013 ENERGY STAR® Summary of Lighting Programs (Summary)**. The Summary provides an overview of a variety of programs offered by utilities and other energy efficiency program sponsors in the United States to promote ENERGY STAR certified lamps and luminaires¹, decorative light strings, and ceiling and ventilating fans with light kits. The Summary includes information provided by energy efficiency program sponsors and describes their current program offerings for 2013-2014 and beyond.

Each ENERGY STAR lighting program is summarized with a focus on incentives (e.g., mail-in rebates, buy-downs, and instant rebates), marketing and consumer education efforts, program contacts, and other relevant program details. Participation in the Summary is voluntary and therefore does not represent all promotions and incentives available across the country.

The Summary of Lighting Programs is divided into the following sections:

1. **Executive Summary**
2. **Program Budget Map, National Promotion Charts and Graphs** – Overview of promotion types for lighting programs across the United States.
3. **Programs at a Glance** – A summary table of current lighting promotions organized by state.
4. **Program Details** – In-depth descriptions of each energy efficiency program sponsor's programs, including contact information for program managers.

If you have any questions or comments about the ENERGY STAR Summary of Lighting Programs, please contact Nora Lovrien Buehler at ICF International, at nora.lovrienbuehler@icfi.com or 202.862.1589.

¹ Lamps and luminaires are referred to by partners typically as bulbs and fixtures respectively and are used interchangeably in the document.

Executive Summary

The 2013 ENERGY STAR Summary of Lighting Programs (Summary) presents information submitted by 144 energy efficiency program sponsors from across the United States, including 13 “umbrella organizations” and statewide programs running promotions on behalf of or in conjunction with 229 cooperative or municipal utilities and investor-owned utilities. Partners have provided information about 1,208 individual incentive and promotion programs for ENERGY STAR certified lighting products including spiral and specialty compact fluorescent lamps (CFLs) (e.g., decorative bulbs, high-wattage, and dimmable); compact fluorescent luminaires (fixtures); light emitting diode (LED) lamps and luminaires; decorative light strings; and ceiling fans and components sold separately, such as light kits. Programs that promote ENERGY STAR certified lighting in residential new construction programs are also included. Many energy efficiency program sponsors chose to submit information about a variety of other lighting technologies, such as commercial lighting technologies, which are not covered by an ENERGY STAR product specification. To improve the accuracy of available promotions nationwide, information submitted under umbrella organizations has been accounted for individually for each member utility, unless otherwise indicated as a statewide or centrally-administered program.

From the information submitted by energy efficiency program sponsors, highlights include:

Program Budgets – Partners were asked to categorize their program budgets into buckets demonstrating order of magnitude and range (e.g., less than \$250K, \$1-\$10 million). To calculate state totals and the national total, the mid-point of each bucket range was taken and multiplied by the total number of partner programs identifying with a given bucket. Since exact budget information has not been provided, nor have all partners given budget information (see the [“Lighting Program Budget Map”](#) on page 3 for more details), a precise total cannot be determined. However, the trend in lighting program budgets is upward. In 2011, based on the midpoint calculation, lighting programs were funded at about \$390 million. In 2012 that number increased to about \$450 million and in 2013, the national total is just under \$470 million.

Promotions by Dollar Amount – Promotion amounts in 2013 range from \$0.25 for spiral CFLs to \$300 for some new construction programs. The average for CFL luminaires and LED lamps decreased from 2012, with the most dramatic drop for LED lamps (average 2012 LED lamp = \$13.50 and 2013 = \$9.81). All other average incentive amount increased or remained roughly the same as 2012. See [“Average Promotion Amount for ENERGY STAR Lighting Products 2011-2013”](#) on page 4 for more detail on average incentive values.

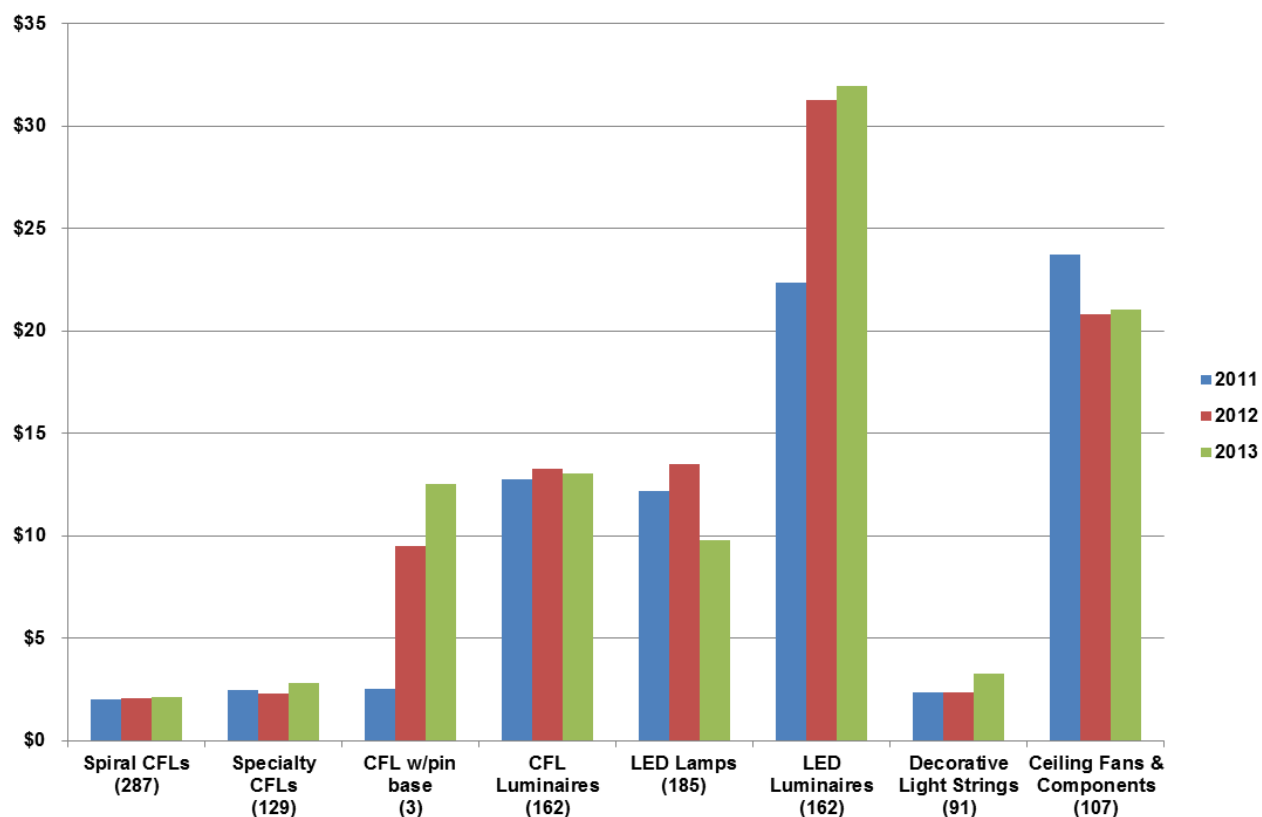

Promotions by Product – LED lamps, luminaires, and decorative light string promotions continued to increase in comparison to 2012 and 2011. While promotions for CFL technologies still comprise the plurality of product promotions (48%, with 35% comprised of spiral and specialty CFL lamps); they declined 8 percentage points compared to 2012. LED technologies grew this year from 13% of promotions in 2012 to 15% for lamps (bulbs), 12% in 2012 to 13% for luminaires (fixtures), and 3% in 2012 to 8% for decorative light strings. See [“2013 ENERGY STAR and Energy-Efficient Lighting Promotions by Product Type”](#) on page 4 and [“ENERGY STAR and Energy-Efficient Lighting Promotions by Product Type 2011-2013”](#) on page 5 for more detail.

Promotions by Type – Partners use a variety of methods to promote lighting products. In 2013, the most common promotion type is a mail-in rebate with 69%. This is attributable to the large number of small cooperative and municipal utilities included in this Summary. Buy-down programs, which result in discounts and instant rebate programs, remain significant with about 27% of total promotions. Investor-owned utility and statewide programs (serving the majority of customers and having larger program budgets) favor collaborative buy-down programs. See [“2013 ENERGY STAR and Energy-Efficient Lighting Promotions by Incentive Type”](#) on page 5 for more detail.

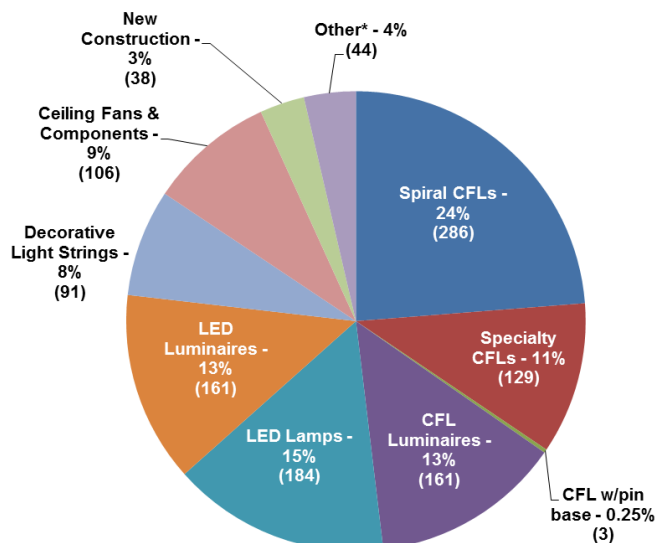

Promotions by Region – Similar to 2011 and 2012, the Midwest region has the greatest number of lighting promotions with 851 (2012 = 284). The significant increase relates to the large number of umbrella organizations working with small utilities that are participating in the 2013 Summary. The West and Northeast regions follow the Midwest with 113 and 106 respectively (2012 = 95 and 80). The Southwest region decreased its submissions from 63 in 2012 to 43 in 2013. The Mid-Atlantic submitted 49 promotions compared to 41 last year and the Southeast region added 11 new promotions for a total of 46. See [“2013 ENERGY STAR and Energy-Efficient Lighting Promotions by Type and Region”](#) on page 6 for more detail.

National Lighting Promotion Charts and Graphs

Average Promotion Amount for ENERGY STAR Lighting Products 2011-2013
(2013 totals listed in parentheses)

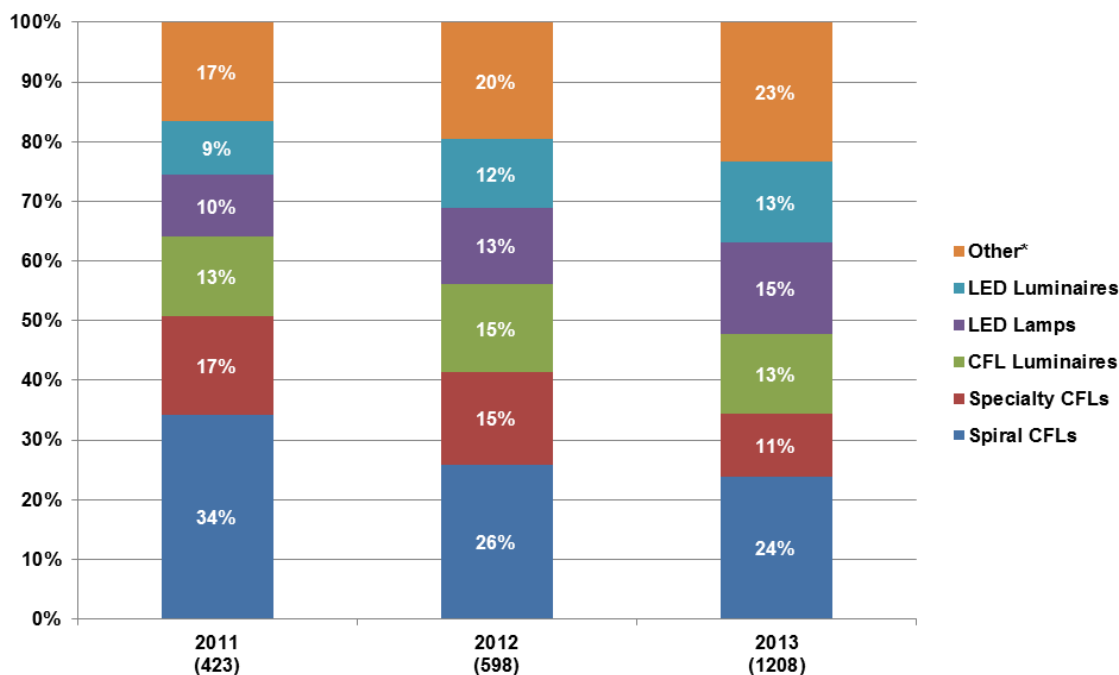

2013 ENERGY STAR and Energy-Efficient Lighting Promotions by Product Type
(Totals listed in parentheses)

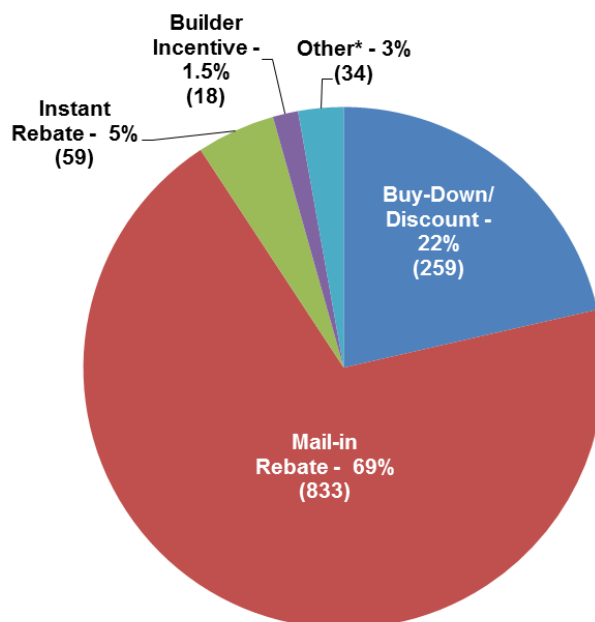

* The "Other" category is comprised primarily of commercial lighting products, such as LED exit signs, fluorescent T-8 or T-5, High Bay lighting, and occupancy sensors. See the ["Lighting Programs at a Glance"](#) for individual partner details.

ENERGY STAR and Energy-Efficient Lighting Promotions by Product Type 2011-2013 (Annual totals listed in parentheses)

* The "Other" category is comprised primarily of commercial lighting products, such as LED exit signs, fluorescent T-8 or T-5, High Bay lighting, and occupancy sensors, but also includes ENERGY STAR decorative light strings, CFLs w/pin base, and new construction programs. See the ["Lighting Programs at a Glance"](#) for individual partner details.

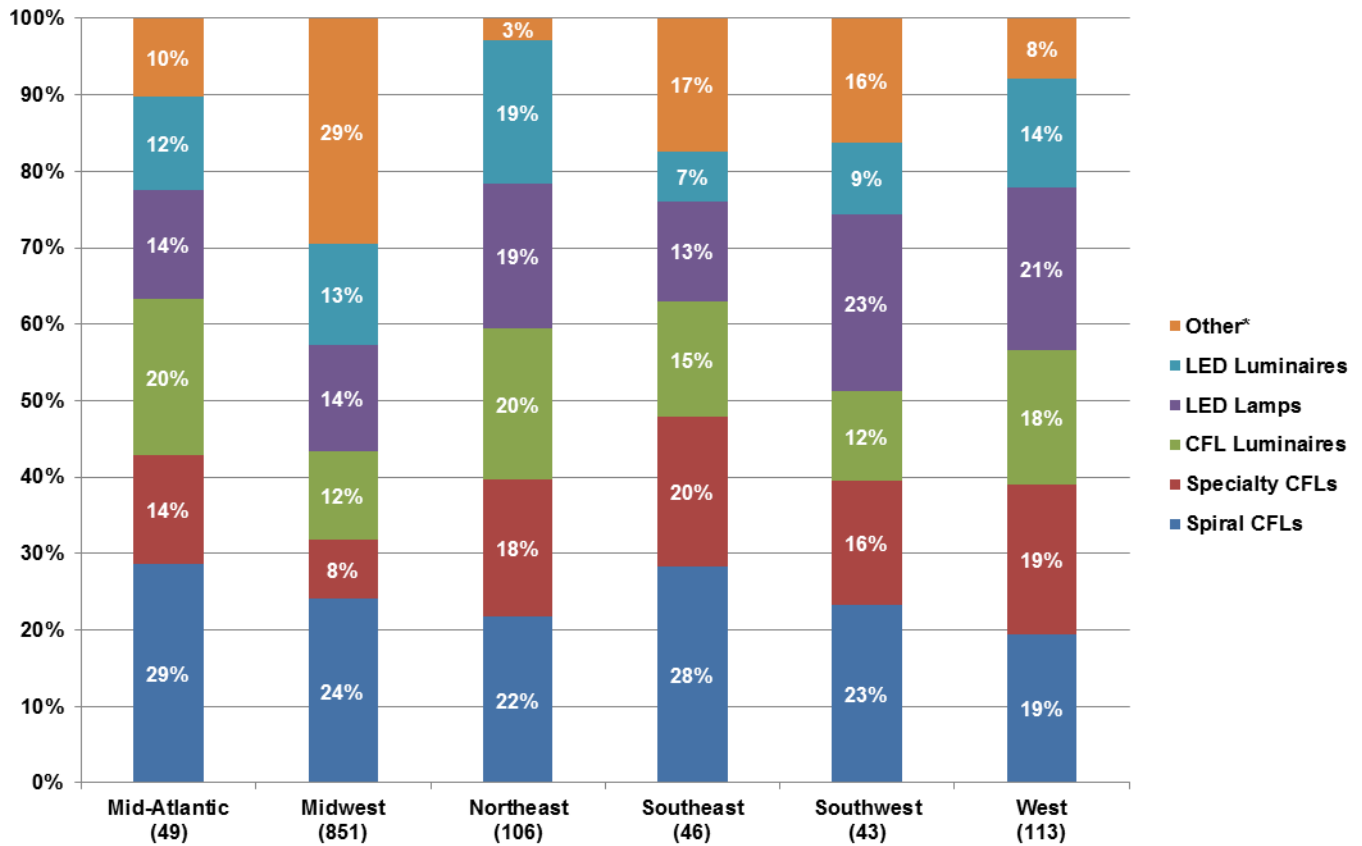

2013 ENERGY STAR and Energy-Efficient Lighting Promotions by Incentive Type (Totals listed in parentheses)

* The "Other" category is comprised of give-away or trade-in programs, fund raisers, low-interest loans, bill credits, and other miscellaneous promotion types. See the ["Lighting Programs at a Glance"](#) for individual partner details.

NOTE: The large percentage of mail-in rebates is attributable to the significant number of small cooperative and municipal utilities included in this Summary. Investor-owned utility and statewide programs (serving the majority of customers and having larger program budgets) favor collaborative buy-down programs.

2013 ENERGY STAR and Energy-Efficient Lighting Promotions by Type and Region (Regional totals listed in parentheses)

* The "Other" category is comprised primarily of commercial lighting products, such as LED exit signs, fluorescent T-8 or T-5, High Bay lighting, and occupancy sensors, but also includes ENERGY STAR decorative light strings, CFLs w/pin base, and new construction programs. See the ["Lighting Programs at a Glance"](#) for individual partner details.

Lighting Programs at a Glance

This table is designed to provide an overview of products being promoted around the country and is organized by state. Please see the individual energy efficiency program sponsors' entries in the next section, Program Details, for more information.

* = Information from 2012.

Lighting Program Details

The table below provides detailed information on each energy efficiency program sponsor's program information. All promotions and incentives are for ENERGY STAR certified products unless otherwise specified. In some cases, energy efficiency program sponsors have indicated which partner types they are most interested in working with, but may also be open to working with different partner types. Please contact the program sponsor representative to learn more about partnership opportunities.

FL	Kissimmee Utility Authority (KUA) Scott Grieves sgrieves@kua.com	<p>Specialty and Spiral CFL and LED Light Bulb and Fixture Incentives: Mail-in Rebate. The intent of this program is to encourage the use of ENERGY STAR certified lighting products (CFLs or LEDs) by our customers. Rebates apply to (CFLs or LEDs) and are limited to one rebate per residential location only.</p> <p>Note: KUA is not responsible or liable for manufacturer defects in the CFLs or LEDs; they shall be returned to the manufacturer and not to KUA. It is the responsibility of the customer to follow all local, state, and EPA requirements for disposal of CFL/ LED light bulbs.</p> <p>Other Activities: Customer education. In addition to mail-in rebates, KUA will include educational promotions during which ENERGY STAR certified light bulbs are given to customers at a discounted rate or in some cases free.</p> <p>Website: www.kua.com/Resources/rebates.pdf</p>
GA	Georgia Power Vicki Nichols (Residential) 404-506-6778 vdnichol@southernco.com Sunny Hylton (Commercial) 404-506-7262 shhylton@southernco.com	<p>Spiral CFL Light Bulb Incentive: Georgia Power is offering a retail mark-down of \$3 per 4-pack of CFLs based on wattage. Products must be ENERGY STAR certified.
