

### Third Party Testing and Verification Program for ENERGY STAR Qualified CFLs (2009 - Present)

Testing Round (Date Range for Results)	Number of CFLs Tested	Number of CFLs with Deficient Reports	Number of Unique Models Disqualified*
Batch 1 (5/1/10 - 2/5/11)	68	21	12
Batch 2 (2/6/11 - 8/1/11)	68	29	21

\*Difference between total with deficient reports and total disqualified is due to the fact that some test failures were investigated and determined not to result in product failures due to issues such as lab errors and de minimis performance failures.
