

## **AUGUST 2013 UPDATE**

**(Revised April 2014)**

The U.S. Environmental Protection Agency (EPA) is pleased to provide the **2013 ENERGY STAR® Summary of Appliance Programs** (Summary). The Summary provides an overview of a variety of programs offered by utilities and other energy efficiency program sponsors in the United States to promote ENERGY STAR certified clothes washers, dehumidifiers, dishwashers, refrigerators, freezers, room air conditioners (room ACs), room air cleaners and purifiers, and water coolers. The Summary includes information provided by energy efficiency program sponsors and describes their current program offerings in 2013-2014 and beyond.

Each ENERGY STAR residential appliance program is summarized with a focus on incentives (e.g., mail-in rebates, recycling), marketing and consumer education efforts, program contacts, and other relevant program details. Participation in the Summary is voluntary and therefore does not represent all promotions and incentives available across the country.

The Summary of Appliance Programs is divided into the following sections:

1. **Executive Summary**
2. **Program Budget Map, National Promotion Charts and Graphs** – Overview of promotion types for appliances programs across the United States.
3. **Programs at a Glance** – A summary table of current appliance promotions organized by state.
4. **Program Details** – In-depth descriptions of each energy efficiency program sponsor’s programs, including contact information for program managers.

If you have any questions or comments about the ENERGY STAR Summary of Appliance Programs, please contact Nora Lovrien Buehler at ICF International, at [nora.lovrienbuehler@icfi.com](mailto:nora.lovrienbuehler@icfi.com) or 202.862.1589.

## Executive Summary

---

The 2013 ENERGY STAR Summary of Appliance Programs (Summary) presents information submitted by 157 energy efficiency program sponsors from across the United States, including 13 “umbrella organizations” and statewide programs running promotions on behalf of or in conjunction with 233 cooperative or municipal utilities and investor-owned utilities. Partners have provided information on 1,538 individual incentive and promotion programs for ENERGY STAR appliances including clothes washers, dishwashers, dehumidifiers, refrigerators, freezers, room air conditioners, room air cleaners and purifiers, water coolers, and a variety of other equipment. To improve the accuracy of available promotions nationwide, information submitted under umbrella organizations has been accounted for individually for each member utility, unless otherwise indicated as a statewide or centrally-administered program.

From the information submitted by energy efficiency program sponsors, the key highlights include:

**Program Budgets** – Partners were asked to categorize their program budgets into buckets demonstrating order of magnitude and range (e.g., less than \$250K, \$1-\$10 million). To calculate state totals and the national total, the mid-point of each bucket range was taken and multiplied by the total number of partner programs identifying with a given bucket. Since exact budget information has not been provided, nor have all partners given budget information (see the [Appliance Program and Budget Map](#) on page 3 for more details), a precise total cannot be determined. However, the trend in appliance program budgets is upward. In 2011, based on the midpoint calculation, appliance programs were funded at about \$208 million. In 2012, that number increased to about \$222 million and in 2013, the national total is nearly \$224 million.<sup>1</sup>

**Promotions by Dollar Amount** – Promotion amounts in 2013 range from \$5 for dehumidifiers and refrigerators to \$525 for evaporative coolers (a non-ENERGY STAR product). The average incentives for dishwashers, freezers, and room air conditioners, along with refrigerators and freezers recycling decreased from 2012. The largest decrease was for dishwashers, which declined from an average incentive of \$65.11 in 2012 to \$28.81 in 2013. The average for room air cleaners and purifiers increased from \$22.50 in 2012 to \$32.60 in 2013. The average incentives for clothes washers, dehumidifiers, refrigerators, water coolers, and dehumidifiers and room air conditioners recycling remained consistent. See “[Average Promotion Amount for ENERGY STAR Appliances 2011-2013](#)” on page 4 for more details on average incentive values.

**Promotions by Product** – As in 2011 and 2012, incentives for clothes washers and refrigerators lead the group, each representing 17%. Incentives for dishwashers and room air conditioners follow behind accounting for 11% each, with refrigerators recycling (10%), freezers recycling (9%), dehumidifiers (9%), and freezers (8%) following closely behind. The remainder is comprised of room air cleaners and purifiers along with the “other” and “other recycling” categories comprised of various products. Dehumidifiers experienced the greatest jump in incentives percentage-wise with utilities offering 137 incentives for the product in 2013 compared to 34 in 2012. See “[2013 ENERGY STAR Appliance Promotions by Product Type](#)” on page 4 and “[ENERGY STAR Appliance Promotions by Product Type 2011-2013](#)” on page 5 for more details.

**Promotions by Type** – Similar to 2011 and 2012, the vast majority of promotions, 75%, are mail-in rebates. Partners submitted information about a few instant rebates for appliances; this may be a category to watch over the next year. Recycling incentives represent 23% of appliance promotions with loans and retailer buy-downs accounting for the rest. See “[2013 ENERGY STAR Appliance Promotions by Incentive Type](#)” on page 5 for more details.

**Promotions by Region** – Similar to 2011 and 2012, the Midwest region has the greatest number of appliance promotions with 1,094, an increase from 251 in 2012. The significant increase relates to the large number of umbrella organizations working with small utilities in the region. The West region follows next with 177, which is a decrease of 22 submissions from 2012. The Northeast (82), Mid-Atlantic (80), Southwest (68), and Southeast (37) have all increased total promotions from 2012. See “[2013 ENERGY STAR Appliance Promotions by Type and Region](#)” on page 6 for more details.

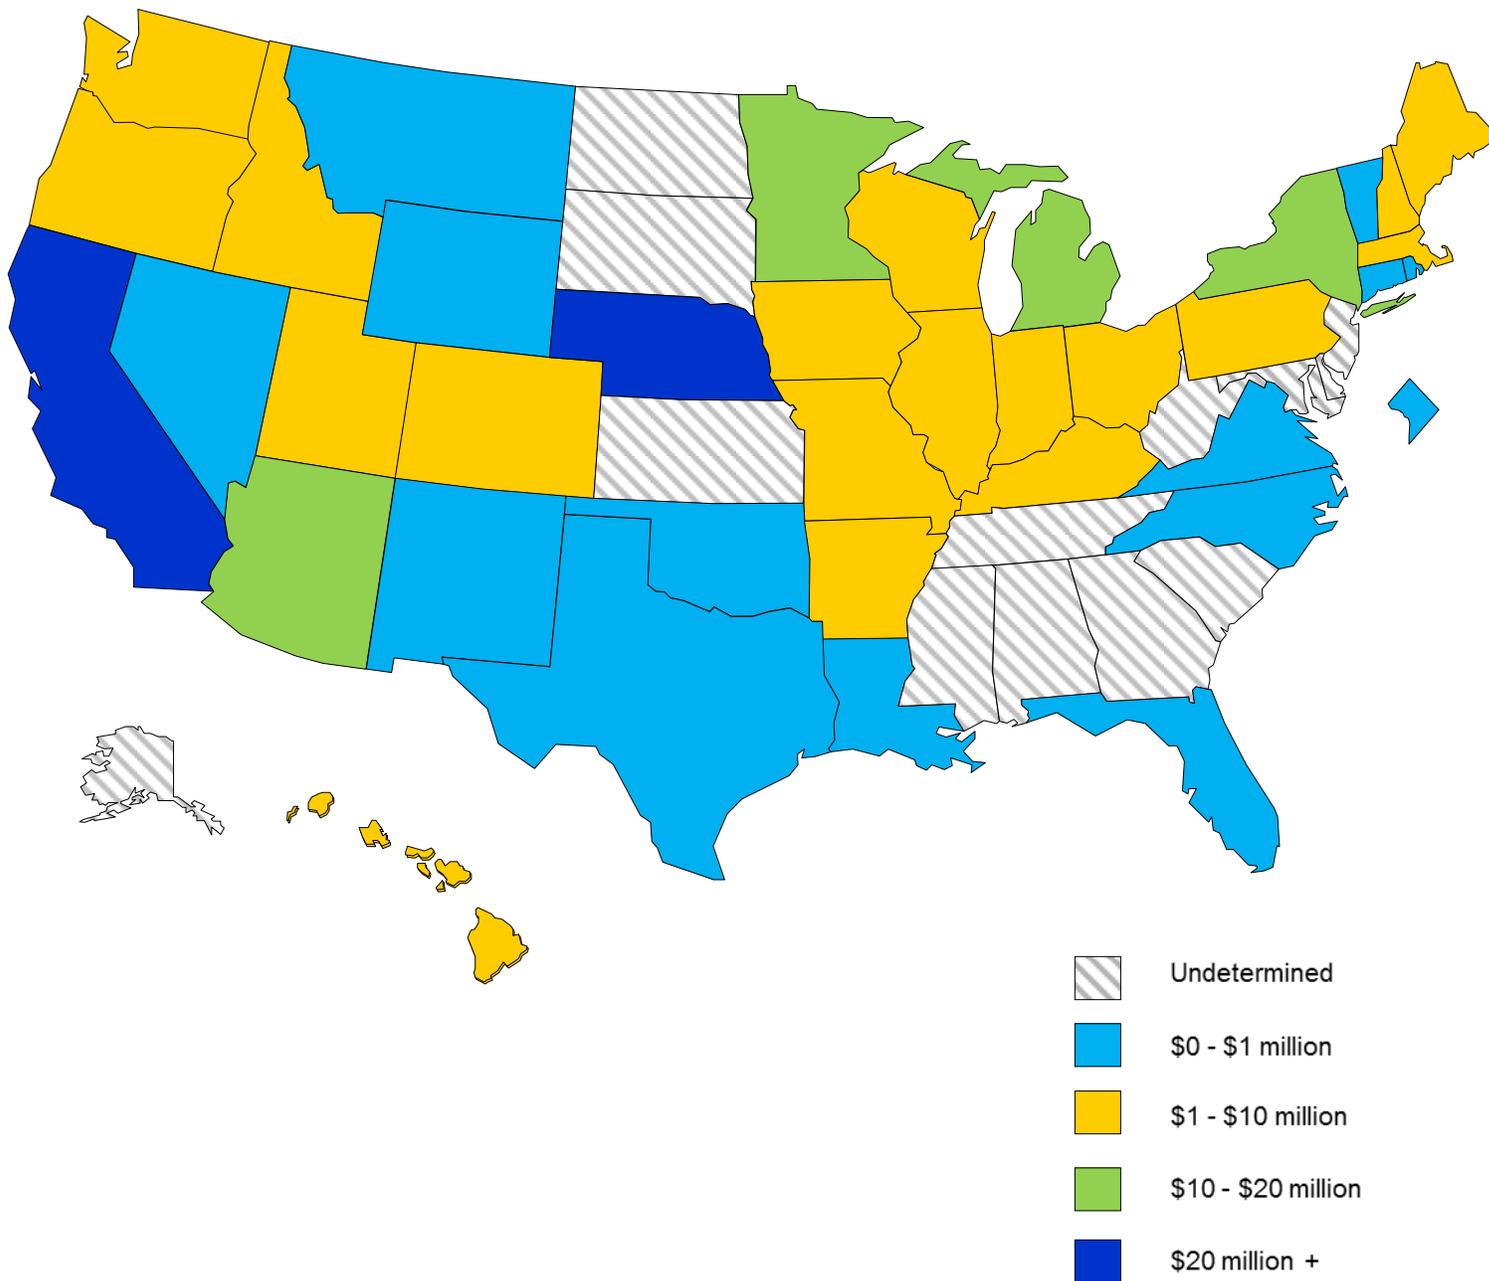

---

<sup>1</sup> The August 2013 version inadvertently counted budget data for each product type rather than once for an entire appliance program resulting in program budgets being counted more than once in some cases. The miscalculation has been corrected and accurate 2013 data are listed above.

## Appliance Program Budget Map

The map below show program budgets for appliance programs by state as reported by the energy efficiency program sponsors.<sup>2</sup>

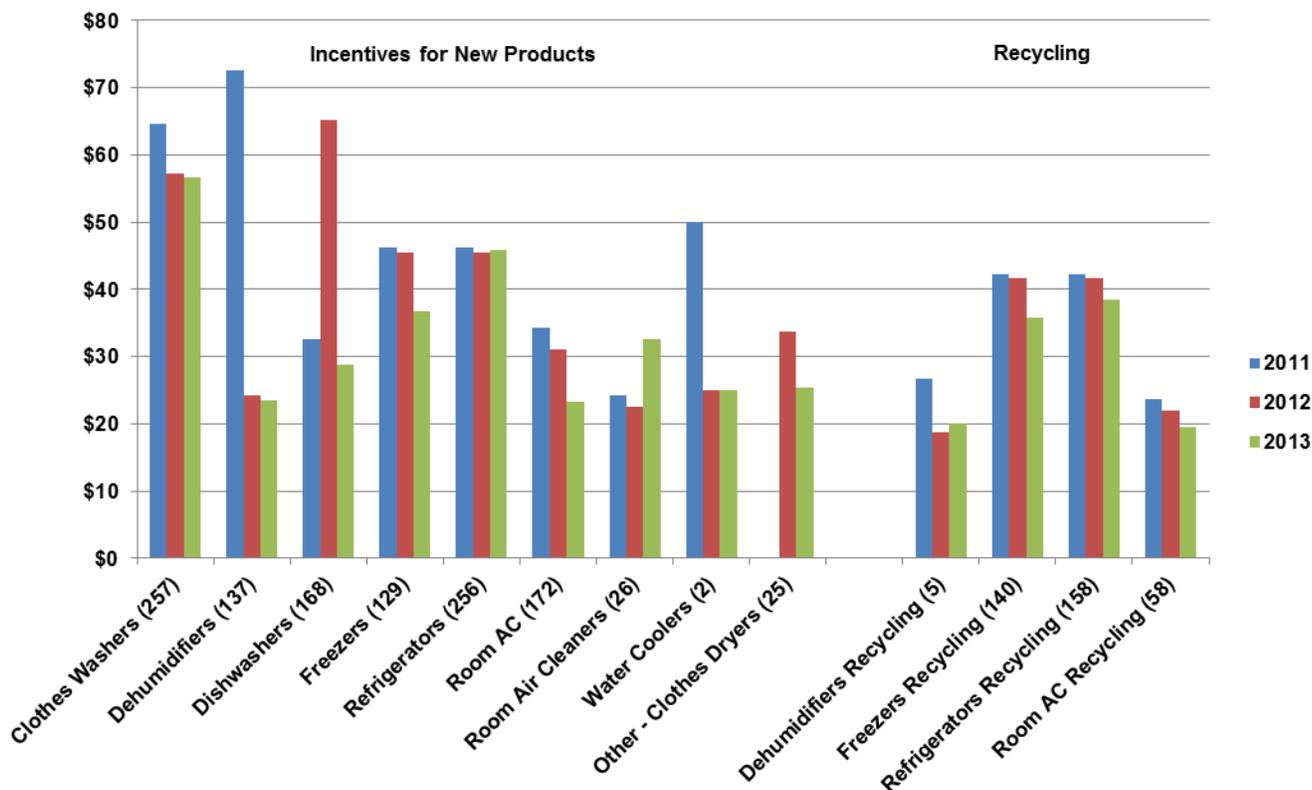

**NOTE:** Energy efficiency program sponsors in the “undetermined” states may implement appliance promotional programs in 2013 and beyond, but were unable or did not elect to provide funding information. Likewise, states highlighted in color may not represent all the partner program budgets, as partners in those states also may have elected not to provide budget information. See the individual program entries for details.

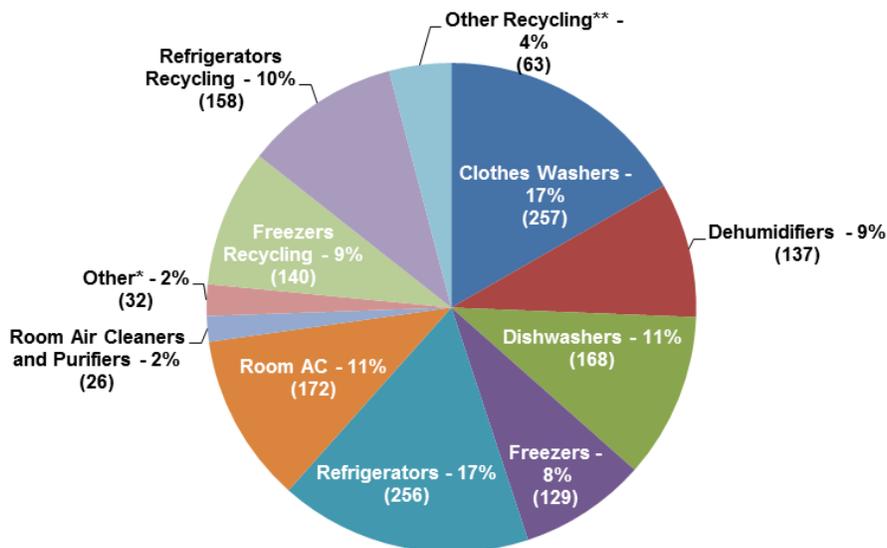

<sup>2</sup> The August 2013 version inadvertently counted budget data for each product type rather than once for an entire appliance program resulting in program budgets being counted more than once in some cases. The miscalculation has been corrected and the map shows accurate budget data by state. Arizona, Colorado, Florida, Hawaii, Illinois, Massachusetts, Michigan, Minnesota, Missouri, Montana, New Mexico, New York, Vermont, Virginia, Washington, Wisconsin moved down one budget bracket, while Iowa, Kentucky, Maine, Ohio, Oregon, Pennsylvania, Utah moved down two budget brackets.

## National Appliance Promotion Charts and Graphs

**Average Promotion Amount for ENERGY STAR Appliances 2011-2013**  
(2013 totals listed in parentheses)

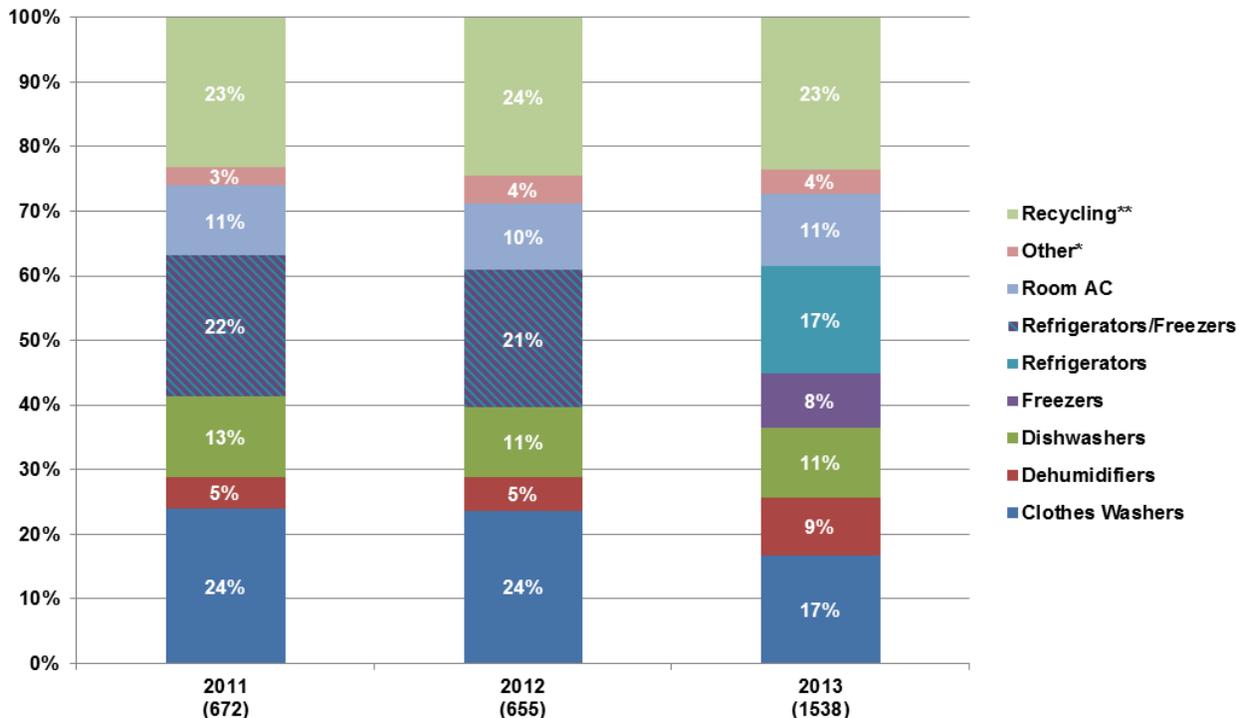

**2013 ENERGY STAR Appliance Promotions by Product Type**  
(Totals listed in parentheses)

\* The "Other" category is comprised of Water Coolers, Clothes Dryers, and Evaporative Coolers.

\*\* The "Other Recycling" category is comprised of Dehumidifiers Recycling and Room Air Conditioner Recycling. See the "[Appliance Programs at a Glance](#)" for individual partner details.

### ENERGY STAR Appliance Promotions by Product Type 2011-2013 (Annual totals listed in parentheses)

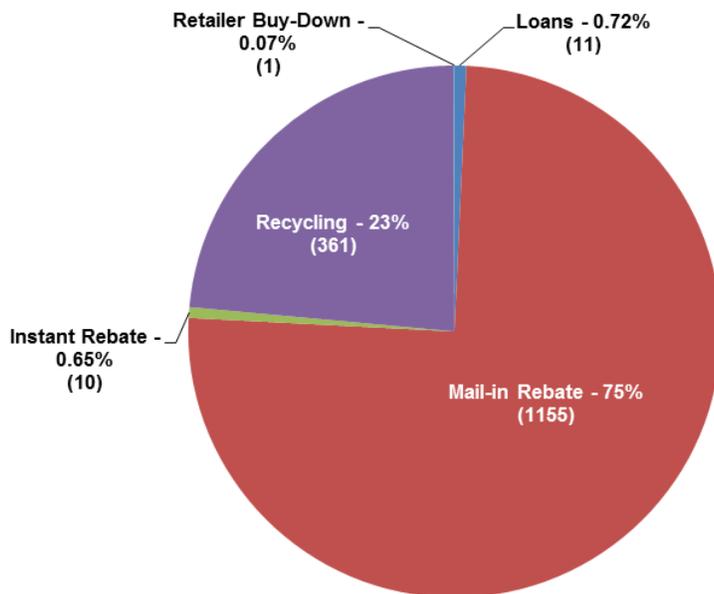

\* The "Other" category is comprised of Water Coolers, Clothes Dryers, and Evaporative Coolers.

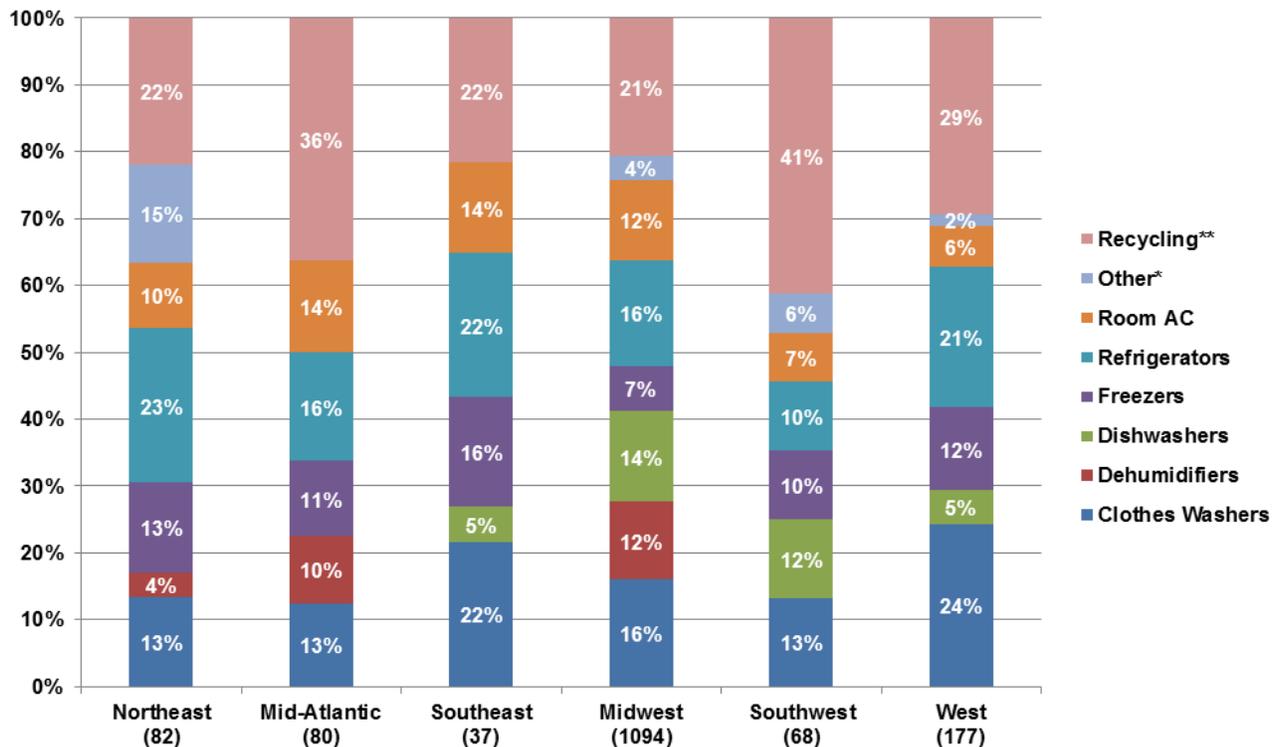

\*\* The "Other Recycling" category is comprised of Dehumidifiers Recycling and Room Air Conditioner Recycling. See the "[Appliance Programs at a Glance](#)" for individual partner details.

**NOTE:** In 2011 and 2012, refrigerator and freezer incentives were combined into a single category. In 2013, these two categories were broken out. To compare across years, 2013 has a combined refrigerators/freezers percentage of approximately 25%.

### 2013 ENERGY STAR Appliance Promotions by Incentive Type (Totals listed in parentheses)

**2013 ENERGY STAR Appliance Promotions by Type and Region**  
*(Regional totals listed in parentheses)*

\* The "Other" category is comprised of Room Air Cleaners and Purifiers, Water Coolers, Clothes Dryers, and Evaporative Coolers.

\*\* The "Recycling" category is comprised of Dehumidifiers Recycling, Freezers Recycling, Refrigerators Recycling and Room Air Conditioner Recycling. See the "[Appliance Programs at a Glance](#)" for individual partner details.

## Appliance Programs at a Glance

This table is designed to provide an overview of products being promoted around the country and is organized by state. Please see the individual energy efficiency program sponsors' entries in the next section, Program Details, for more information. Listed values for target population are assumed to be residential unless otherwise noted.

## Appliance Program Details

The table below provides detailed information on each energy efficiency program sponsor's program information. All promotions and incentives are for ENERGY STAR certified products unless otherwise specified. In some cases, energy efficiency program sponsors have indicated which partner types they are most interested in working with, but may also be open to working with different partner types. Please contact the program sponsor representative to learn more about partnership opportunities.

KEY: EER = Energy Efficiency Rating; EF = Energy Factor; MEF = Modified Energy Factor; TE = Thermal Efficiency; WF = Water Factor

While the Program does not provide direct rebates to consumers, NYSERDA provides incentives to its retail and manufacturer partners to allow them the opportunity to offer high-efficiency products, at a more reasonable price. In addition to these price-reduction incentives, partners also receive funding to create educational displays and advertising pieces, as well as sales staff training to promote the benefits of these high-efficiency products. NYSERDA's web site, <a href="http://www.nyserda.ny.gov">www.nyserda.ny.gov</a>, offers New York residents the opportunity to locate Program Partners throughout State that sell these high-efficiency products.</p> <p>*The SBC territory includes the service territories of Central Hudson Gas and Electric Corporation, Consolidated Edison Company of New York, Inc., New York State Electric and Gas Corporation, National Grid, Orange and Rockland Utilities, Inc., and Rochester Gas and Electric Corporation. This territory largely corresponds with all of New York State except for Nassau and Suffolk counties. The territories exclude areas where the electricity is provided by a municipality, the New York Power Authority, or the Long Island Power Authority.</p> <p>NYSERDA supports ENERGY STAR Most Efficient 2013 Clothes Washers, Freezers, and Refrigerators, and CEE certified Room Air Conditioners. Funding waves run one calendar year for all partner types.</p> <p><u>NYSERDA would like to work with retailers and manufacturers.</u></p>
