ENERGY STAR® SUMMARY
OF LIGHTING PROGRAMS
BY ENERGY EFFICIENCY PROGRAM SPONSORS (EEPS)

SEPTEMBER 2014 UPDATE

The U.S. Environmental Protection Agency (EPA) is pleased to provide the **2014 ENERGY STAR® Summary of Lighting Programs (Summary)**. The Summary provides an overview of a variety of programs offered by utilities and other energy efficiency program sponsors in the United States to promote ENERGY STAR certified lamps and luminaires¹, decorative light strings, and ceiling and ventilating fans with light kits. The Summary includes information provided by energy efficiency program sponsors and describes their current program offerings for 2014-2015 and beyond.

Each ENERGY STAR lighting program is summarized with a focus on incentives (e.g., mail-in rebates, buy-downs, and instant rebates), marketing and consumer education efforts, program contacts, and other relevant program details. Participation in the Summary is voluntary and therefore does not represent all promotions and incentives available across the country.

The Summary of Lighting Programs is divided into the following sections:

1. **Executive Summary**
2. **Program Budget Map, National Promotion Charts and Graphs** – Overview of promotion types for lighting programs across the United States.
3. **Programs at a Glance** – A summary table of current lighting promotions organized by state.
4. **Program Details** – In-depth descriptions of each energy efficiency program sponsor’s programs, including contact information for program managers.

If you have any questions or comments about the ENERGY STAR Summary of Lighting Programs, please contact Nora Lovrien Buehler at ICF International, at nora.lovrienbuehler@icfi.com or 202.862.1589.

¹ Lamps and luminaires are referred to by partners typically as bulbs and fixtures respectively and are used interchangeably in the document.

Executive Summary

The 2014 ENERGY STAR Summary of Lighting Programs (Summary) presents information submitted by 135 energy efficiency program sponsors from across the United States, including 14 “umbrella organizations” and statewide programs running promotions on behalf of or in conjunction with 224 cooperative or municipal utilities and investor-owned utilities. Partners have provided information about 1,250 individual product incentive and promotions for ENERGY STAR certified lighting products including spiral and specialty compact fluorescent lamps (CFLs) (examples of specialty lamps include decorative bulbs, high-wattage, and dimmable); compact fluorescent luminaires (fixtures); light emitting diode (LED) lamps and luminaires; decorative light strings; and ceiling and ventilation fans and components sold separately, such as light kits. Programs that promote ENERGY STAR certified lighting in residential new construction programs are also included. Many energy efficiency program sponsors chose to submit information about a variety of other lighting technologies, such as commercial lighting technologies, which are not covered by an ENERGY STAR product specification. To improve the accuracy of available promotions nationwide, information submitted under umbrella organizations has been accounted for individually for each member utility, unless otherwise indicated as a statewide or centrally-administered program.

From the information submitted by energy efficiency program sponsors, highlights include:

Program Budgets – Partners were asked to categorize their program budgets into buckets demonstrating order of magnitude and range (e.g., less than \$50K, \$1-\$5 million, \$5-\$10 million). To increase granularity of data collected in 2014, partners were given additional options for budget buckets. To calculate state totals and the national total, the mid-point of each bucket range was taken and multiplied by the total number of partner programs identifying with a given bucket. Since exact budget information has not been provided, nor have all partners given budget information (see the [“Lighting Program Budget Map”](#) on page 3 for more details), a precise total cannot be determined. In 2011, based on the midpoint calculation, lighting programs were funded at about \$390 million. In 2012 that number increased to about \$450 million and in 2013, the national total is just under \$470 million. In 2014, the national budget calculation came in at \$447 million. Due to the additional budget bucket detail available to partners this year compared to previous years, it is impossible to say whether this lower budget represents a downward trend or a correction in the data from previous years.

Promotions by Dollar Amount – Typical consumer-focused promotion amounts for light bulbs in 2014 range from \$0.50 for spiral and specialty CFLs to \$30 for LEDs. Promotion amounts for luminaires in 2014 range from \$3 (for either CFL or LED) to \$30 for LED luminaires. The average incentive amount for CFL and LED luminaires, and ceiling fans & components decreased from 2013, with the most dramatic percentage drop for CFL luminaires (24%). All other average incentive amount increased or remained roughly the same as 2013. See [“Average Promotion Amount for ENERGY STAR Lighting Products 2011-2014”](#) on page 4 for more detail on average incentive values.

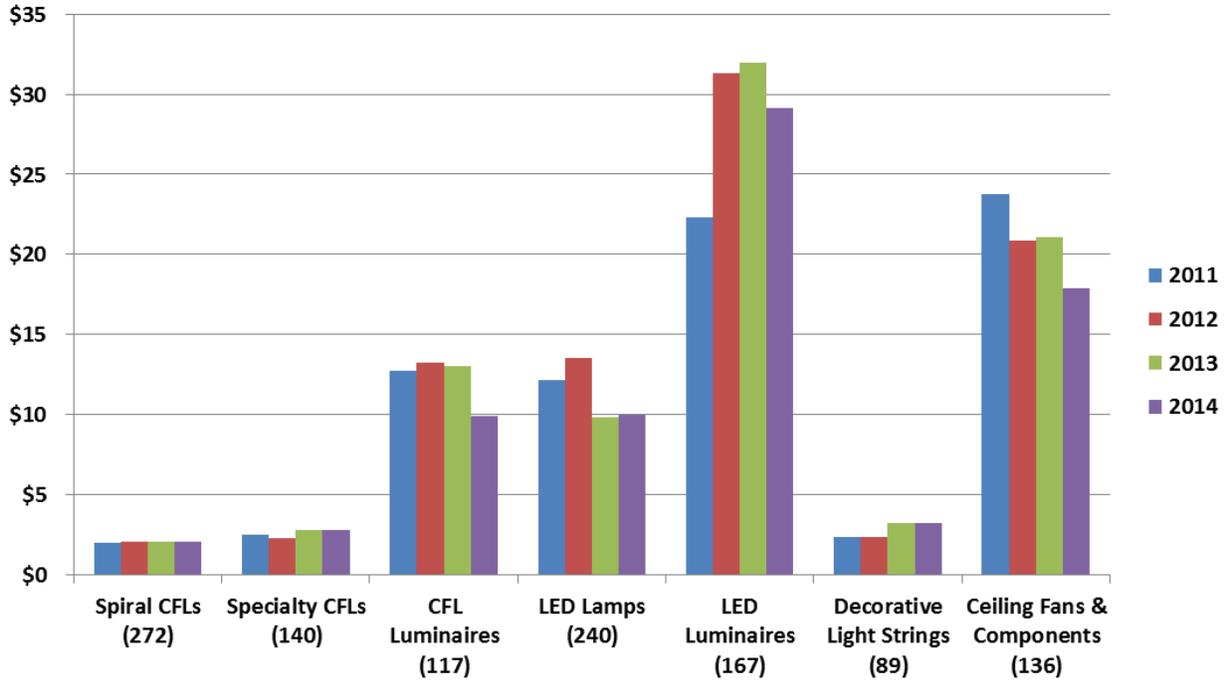

Promotions by Product – LED lamps, luminaires, and specialty CFL promotions continued to increase in comparison to previous years, while spiral CFLs and CFL luminaire promotions declined. While promotions for CFLs (lamps and luminaires) declined by 6 percentage points compared to 2013, they still represent the largest percentage of product promotions (42%, with 33% comprised of spiral and specialty CFL lamps. LED lamp promotions grew from 15% of promotions in 2013 to 19% in 2014. See [“2014 ENERGY STAR and Energy-Efficient Lighting Promotions by Product Type”](#) on page 4 and [“ENERGY STAR and Energy-Efficient Lighting Promotions by Product Type 2011-2014”](#) on page 5 for more detail.

Promotions by Type – Partners use a variety of methods to promote lighting products. In 2014, the most common promotion type is a mail-in rebate with 67%. This is attributable to the large number of small cooperative and municipal utilities included in this Summary. Buy-down programs, which result in discounts and instant rebate programs, remain significant with about 30% of total promotions. Investor-owned utility and statewide programs (serving the majority of customers and having larger program budgets) favor collaborative buy-down programs. See [“2014 ENERGY STAR and Energy-Efficient Lighting Promotions by Incentive Type”](#) on page 5 for more detail.

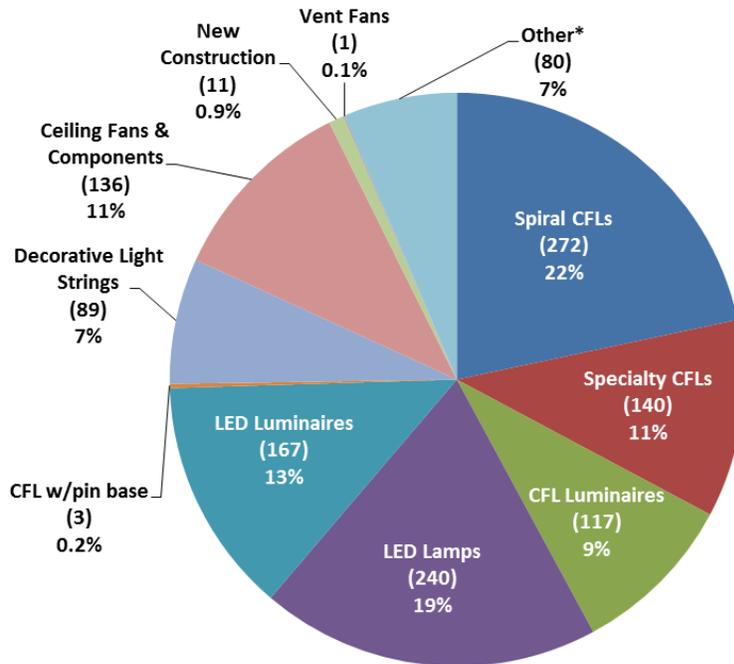

Promotions by Region – The Midwest region has the greatest number of lighting promotions with 874 (2013 = 851). The West and Northeast regions follow the Midwest with 113 and 106 respectively. The Southwest region increased its number of promotions slightly from 43 in 2013 to 48 in 2014. The Mid-Atlantic submitted 57 promotions compared to 49 last year and the Southeast region added 12 new promotions for a total of 58. See [“2014 ENERGY STAR and Energy-Efficient Lighting Promotions by Type and Region”](#) on page 6 for more detail.

National Lighting Promotion Charts and Graphs

**Average Promotion Amount for ENERGY STAR Lighting Products 2011-2014
(2014 totals listed in parentheses)**

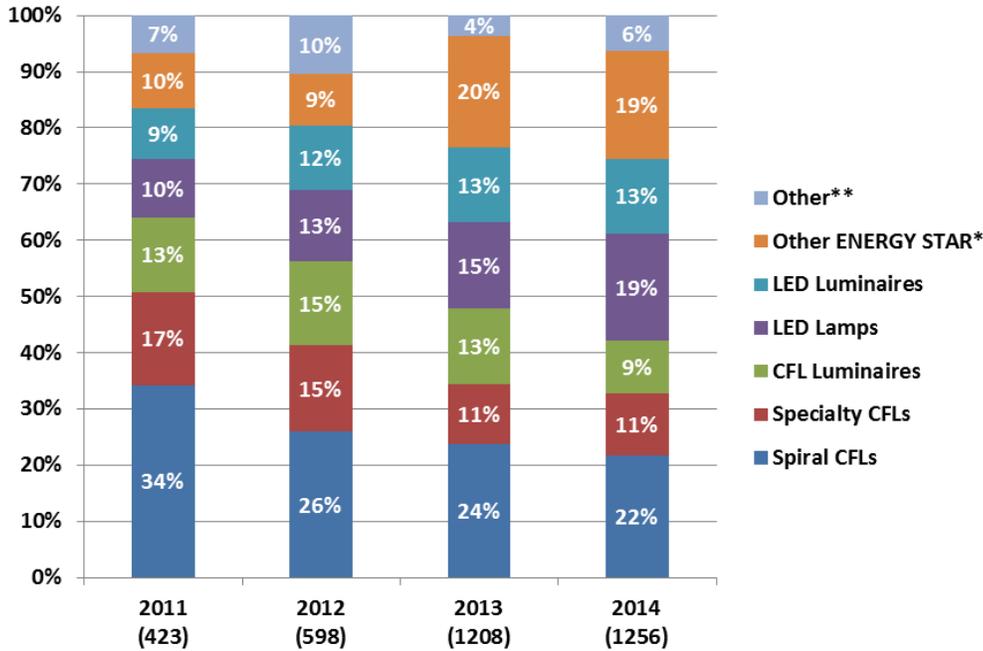

**2014 ENERGY STAR and Energy-Efficient Lighting Promotions by Product Type
(Totals listed in parentheses)**

* The "Other" category is comprised primarily of commercial lighting products, such as LED exit signs, fluorescent T-8 or T-5, High Bay lighting, and occupancy sensors. See the ["Lighting Programs at a Glance"](#) for individual partner details.

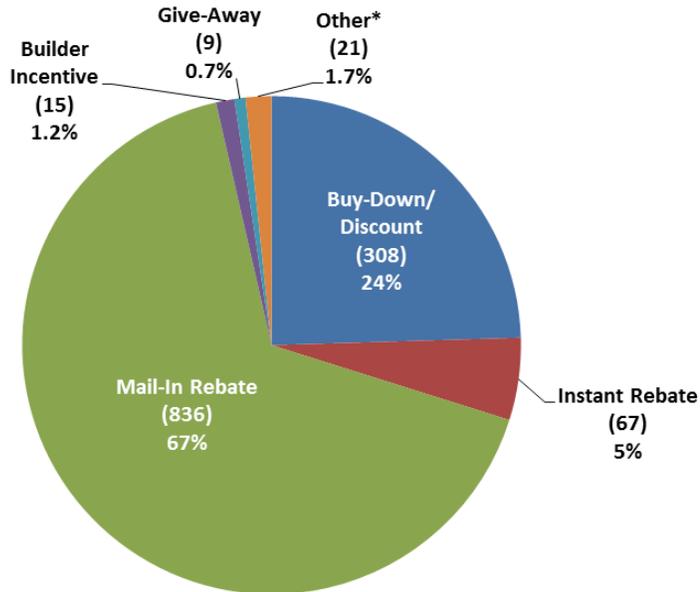

ENERGY STAR and Energy-Efficient Lighting Promotions by Product Type 2011-2014
(Annual totals listed in parentheses)

* The "Other ENERGY STAR" category is comprised of ENERGY STAR decorative light strings, CFLs w/pin base, ceiling and vent fans, and new construction programs. See the ["Lighting Programs at a Glance"](#) for individual partner details.

** The "Other" category is comprised primarily of commercial lighting products, such as LED exit signs, fluorescent T-8 or T-5, High Bay lighting, and occupancy sensors.

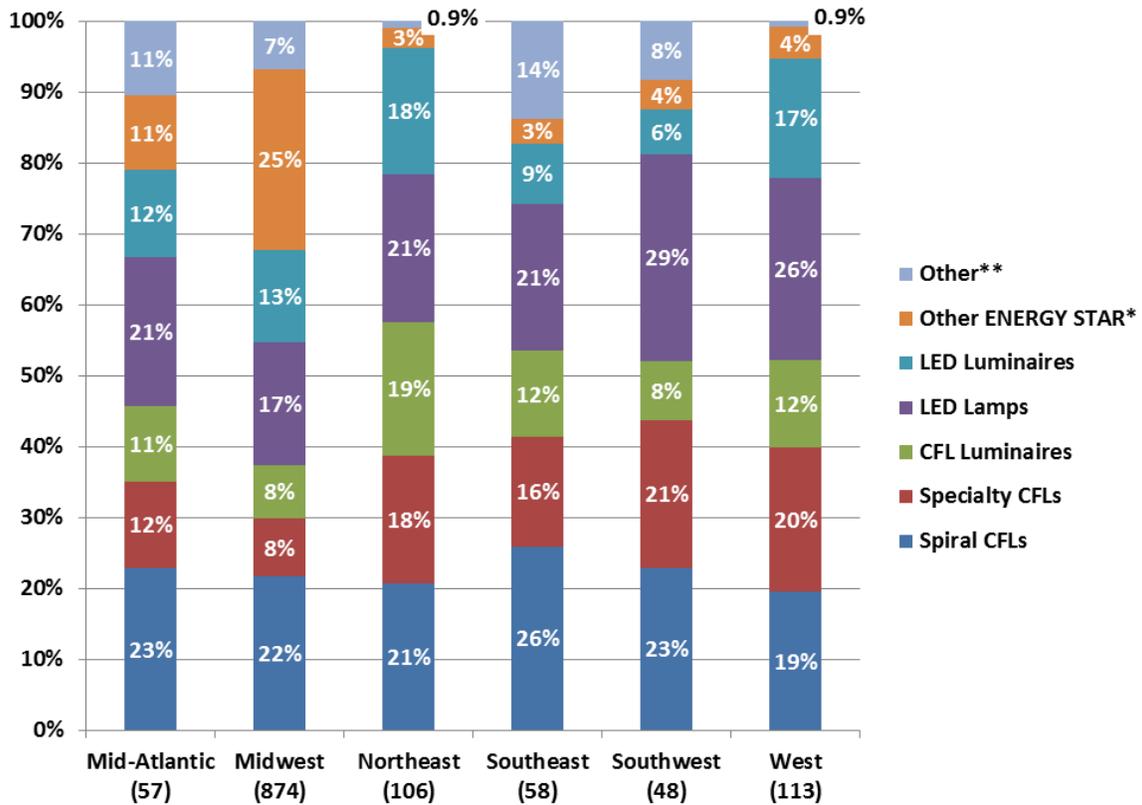

2014 ENERGY STAR and Energy-Efficient Lighting Promotions by Incentive Type
(Totals listed in parentheses)

* The "Other" category is comprised of low-interest loans, bill credits, and other miscellaneous promotion types. See the ["Lighting Programs at a Glance"](#) for individual partner details.

NOTE: The large percentage of mail-in rebates is attributable to the significant number of small cooperative and municipal utilities included in this Summary. Investor-owned utility and statewide programs (serving the majority of customers and having larger program budgets) favor collaborative buy-down and instant rebate programs.

2014 ENERGY STAR and Energy-Efficient Lighting Promotions by Type and Region
(Regional totals listed in parentheses)

* The “Other ENERGY STAR” category is comprised of ENERGY STAR decorative light strings, CFLs w/pin base, ceiling and vent fans, and new construction programs. See the [“Lighting Programs at a Glance”](#) for individual partner details.

** The “Other” category is comprised primarily of commercial lighting products, such as LED exit signs, fluorescent T-8 or T-5, High Bay lighting, and occupancy sensors.

Lighting Programs at a Glance

This table is designed to provide an overview of products being promoted around the country and is organized by state. Please see the individual energy efficiency program sponsors' entries in the next section, Program Details, for more information.

STATE	PARTNER NAME	PROGRAM BUDGET	TARGET POPULATION	PRODUCTS	INCENTIVE AMOUNT	INCENTIVE TYPE	SUPPORT ACTIVITIES	START DATE	END DATE

Lighting Program Details

The table below provides detailed information on each energy efficiency program sponsor's program information. All promotions and incentives are for ENERGY STAR certified products unless otherwise specified. In some cases, energy efficiency program sponsors have indicated which partner types they are most interested in working with, but may also be open to working with different partner types. Please contact the program sponsor representative to learn more about partnership opportunities.
