

Proposed Recognition Criteria Computer Monitors

Scope

Included products. Computer Monitors, as defined below, are eligible for ENERGY STAR® Most Efficient recognition in 2014.

Computer Monitor: An electronic device, typically with a diagonal screen size greater than 12 inches and a pixel density greater than 5,000 pixels per square inch (pixels/in²), that displays a computer's user interface and open programs, allowing the user to interact with the computer, typically using a keyboard and mouse.

Excluded products: The following products are not eligible for ENERGY STAR Most Efficient recognition in 2014:

- Digital Picture Frames
- Professional Signage

Recognition Criteria

1) Product must be ENERGY STAR certified consistent with applicable ENERGY STAR Partner Commitments and the requirements set forth in the Version 6.0 ENERGY STAR Program Requirements Product Specification for Displays. Product performance must be certified by a certification body recognized by the U.S. Environmental Protection Agency (EPA).

2) Additional requirements

$$P_{ON_MAX} = (6 \times r) + (0.032 \times A) - 3.800$$

Where:

P_{ON_MAX} = maximum allowable On Mode Power consumption in W.

r = screen resolution in megapixels

A = viewable screen area of the product in square inches

Recognition Period

EPA will add qualifying models to the ENERGY STAR Most Efficient 2014 product list for computer monitors from January 1, 2014 through December 30, 2014. The ENERGY STAR Most Efficient 2014 designation may be used in association with models recognized during this period for as long as the model remains on the market.
