

LEARN MORE AT
energystar.gov

ENERGY STAR® is a U.S. Environmental Protection Agency program helping businesses and individuals fight global warming through superior energy efficiency.

Dear ENERGY STAR® Partner:

This email serves as a reminder that per the memo distributed by the U.S. Environmental Protection Agency on October 26, 2010, [available here](#), all ENERGY STAR qualified models that were submitted for qualification prior to January 1, 2011 under the programs listed below must be registered with an EPA-recognized Certification Body by March 31, 2011 to remain qualified. The purpose of this registration is to allow CBs to add your models to the population of models that may be sampled for verification testing. The eight ENERGY STAR programs to which this applies are:

- Commercial Steam Cookers
- Commercial Refrigerators and Freezers
- Commercial Griddles (Gas)
- Central Air Conditioners & Air Source Heat Pumps
- Geothermal Heat Pumps (Water-to-Water)
- Light Commercial HVAC
- Roof Products
- Room Air Cleaners

The information you will need to submit to your CB includes:

A list of models you submitted for qualification prior to January 1, 2011, and that you wish to maintain as ENERGY STAR qualified (and therefore subject to verification testing) (please note, only products currently sold in the U.S. or a [partner market](#) are eligible to remain qualified); and

Any additional information your CB may require (this will be similar but not necessarily limited to the information you submitted upon originally qualifying your products).

Once again, EPA requests that you please provide this information to your CB by March 31, 2011. Any models not registered by that date will be removed from the ENERGY STAR Qualified Products lists beginning with the April 15 update, and continued labeling of those products will be considered a logo violation.

As a final note, EPA wishes to remind you that February 15 is the last day you may submit private labeling qualifications or administrative changes for these product categories to ICF International. After that date, please work with your CB to process all such qualifications or changes.

If you have any questions or concerns about this procedure, please contact us at Certification@energystar.gov. Thank you for your continued support of the ENERGY STAR program.

This message was sent to you on behalf of ENERGY STAR. Each ENERGY STAR partner organization must have at least one primary contact receiving e-mail to maintain partnership. If you are no longer working on ENERGY STAR, and wish to be removed as a contact, please update your contact status in your [MESA](#) account. If you are not a partner organization and wish to opt out of receiving e-mails, you may call the ENERGY STAR Hotline at 1-888-782-7937 and request to have your mass mail settings changed. Unsubscribing means that you will no longer receive program-wide or product-specific e-mails from ENERGY STAR.
