**Subject:** Enhanced testing and verification stakeholder group

Good afternoon,

Una Song of the EPA encouraged me to send an email to this address to be included in the enhanced testing and verification stakeholder group.

My name is Nathan Hartmann and I work for Oracle. I've been asked to look into the viability of certifying our own products with the Energy Star logo (Both Tier 1 and the forthcoming Tier 2). The testing would take place internally at a lab we have within Oracle that is both ISO 9001 certified and ISO/IEC 17025 accredited.

If you have any questions, please don't hesitate to contact me. Thank you, Nathan
