---

Dear Sir,

1) Maintain accreditation to ISO/IEC 17025, "General requirements for the competence of testing and calibration laboratories," by an EPA-recognized Accreditation Body (AB)

- could you please advise which AB are EPA-recognized. (similar to FCC DOC by NVLAP?)

2) "in-house" laboratories by manufacturer, laboratory employee compensation or annual bonuses are not tied to the financial performance of the parent company; do not originate with or return to the parent company

- could you please have same procedure like FCC DOC, in case accredited by NVLAP, testing engineers can be in same company.

Regards

Ronnie Yang
