**Comments on “Final Draft Conditions and Criteria for Recognition
of CBs for the ENERGY STAR Program”**

JEITA Energy Saving Committee
(PC group)

Our concern about smooth operational startup in the U.S.

JEITA is highly concerned about the capacity (processing capacity) of the testing laboratories and the CBs, and the lead time.

Please let us know the current situation with regards to the application status for the ABs and testing laboratories, and the current preparatory status and expected outcomes for the CBs (the expected number of CBs).
