

Maria,

Thank you for your invitation to participate in the webinar for the Top Tier Energy Star Products. For 19 years we have been providing a robust efficiency solution for users of commercial refrigeration. We are able to reduce energy consumption in coolers and warehouses by up to 50% with our products. Unfortunately, we can not get an Energy Star rating because we are not the refrigeration equipment, nor are we responsible for controlling an entire building. This is very frustrating since our technology qualifies for significant energy efficiency rebates in many states.

I would ask that you take a quick minute to review our web site [here](#), and a few case studies [here](#). The case studies all contain a return on investment section that you will find eye-popping. I have also attached additional information to this e-mail.

Thank you for your time and I would be very interested in your comments. Don't hesitate to contact me If you have any questions, or require additional information.

Warmest Regards,  
Jeffrey Paquet
