Subject: Feedback Regarding Super Star Program

To Whom it May Concern,

I am writing to provide you with Fujitsu General America's feedback to ENERGY STAR's proposed Super Star program. We are in favor of this program, as it will set the top efficient products apart from the rest. By highlighting the companies that do strive for higher efficiency products we hope other companies will follow. Super Star sets the bar high and proves that it is possible to achieve such high efficiency ratings. We also have a few suggestions in ways to promote the Super Star program on your web site, specifically changing the navigation so that it is more consumer friendly.

We have a question - we understand manufacturers must meet specific criteria regarding SEER, HSPF and EER for heating/cooling equipment. Is the 5% based on one or all of those specific ratings?

Sincerely,

Erin Mezle
