**DEFINITIONS**

*Single Package Equipment* includes ASHPs or CACs that combine both condenser and air handling capabilities in a single casing. Air is treated at a central location and carried to and from the rooms in a house by one or more fans and a system of ducts.

*Split Systems* are ASHPs or CACs with separate indoor (evaporator) and outdoor (condenser) units. Air is treated at a central location and carried to and from the rooms in a house by one or more fans and a system of ducts.

EPA plans to use the data only for program evaluations. EPA will release this information only as aggregated data and only to the extent required by law.

The public reporting and recordkeeping burden for this collection of information is estimated to average 6.69 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the Director, Collection Strategies Division, U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.
