DEFINITIONS

¹Indoor fixtures include all portable and hardwired fixtures intended for indoor use. Fixtures in this category would include those that are interior ceiling mounted, wall-mounted, recessed, suspended, torchiere and non-torchiere portable, under-cabinet, furniture/cabinet integrated, and architectural.

²Outdoor fixtures include all line-voltage fixtures that are generally attached directly to a residential building or on top of a pole, and are used to illuminate walkways, entrances, and other areas around a residence. All house-mounted and pole-mounted (post-top) line voltage fixtures fall within this category. Outdoor fixtures must be rated for wet or damp locations.

³GU-24 Based Integrated Lamp: A lamp unit that integrates the lamp and its ballast. It does not include any replaceable or interchangeable parts, and utilizes the GU-24 base type.

EPA plans to use the data only for program evaluations. EPA will release this information only as aggregated data and only to the extent required by law.

The public reporting and recordkeeping burden for this collection of information is estimated to average 6.69 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the Director, Collection Strategies Division, U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.
