

Dear Fryer Manufacturer or Other Interested Party,

EPA is pleased to provide you with the Final ENERGY STAR Commercial Fryer specification. The attached specification outlines the performance, testing, and labeling requirements that qualifying products must meet in order to bear the ENERGY STAR. Please note that EPA considers this specification to be final and has no further plans to revise it at this time.

EPA will be promoting this specification at the North American Association of Food Equipment Manufacturers (NAFEM) Show, September 5-7, 2003 in New Orleans, LA. Those manufacturers that sign a Partnership Agreement prior to the show will be listed as participating partners in press releases and fact sheets. At the show, EPA will also assist manufacturing partners in promoting their participation in the program and qualified products on display, as appropriate.

All manufacturers interested in joining the ENERGY STAR program for commercial fryers should respond to Mehernaz Polad, ICF Consulting, at mpolad@icfconsulting.com to receive a customized Partnership Agreement and Qualifying Product Information (QPI) form.

We look forward to working with you to promote and sell ENERGY STAR qualified fryers!

Thank you.
