Dear HRV/ERV Stakeholders:

ENERGY STAR Specification for HRV/ERV

Natural Resources Canada (NRCan) and the U.S. Environmental Protection Agency (EPA) are pleased to provide the attached Final Draft Version 1.0 ENERGY STAR specification for Heat Recovery Ventilators / Energy Recovery Ventilators (HRV/ERV).

Comments received since the last draft are or will be available shortly on the Product Development Web site at [www.energystar.gov/productdevelopment](http://www.energystar.gov/productdevelopment) by clicking on “New Specifications in Development”. Comments received are also summarized in the attached comments matrix.

EPA and NRCan have discussed and considered your comments. Our response to comments and rationale for changes beyond the last draft are the comments matrix and in the comment boxes within the final draft specification.

Once again, we thank those who have provided comments.

As previously communicated, the proposed timeline for the H/ERV specification development process is as follows:

November 10, 2009	–	Final Draft Version 1.0 H/ERV specification distributed to industry
November 24, 2009	–	Comments due on Final Draft Version 1.0 H/ERV specification
December 14, 2009	–	Final Version 1.0 H/ERV specification distributed to industry
January 1, 2010	–	Effective date of Version 1.0 H/ERV specification

NRCan and EPA would appreciate receiving any further comments by November 24, 2009. My contact information is [bkillins@nrcan.gc.ca](mailto:bkillins@nrcan.gc.ca) and telephone 613 947 8764. All comments should be considered public unless the submitter requests that his/her comments remain confidential.

Regards,

Brian Killins  
Senior Standards Engineer
