

Hello EPA spec. team.

As an ENERGY STAR® partner, Amerlux Global Lighting Solutions takes the stance that the removal of the low voltage LED lamps from the first draft should remain that way and not be added on in the next draft. This statement is based off of feedback from the recent meeting in DC. We firmly believe that if it is not offered for the LED luminaire specification, it should not be offered for the less robust lamps.

Thanks,
Alex Guerrero
Director of R&D
Amerlux Global lighting solutions.
