40 - 50 W	51	38	13	25%	12	24%
50 - 100 W	195	185	49	25%	49	25%
> 100 W	66	52	19	29%	15	23%
TOTALS	1651	1388	458	28%	419	25%

The above compliance rates do not include the PF requirement. PF data is not available for all models above 100 watts input power in EPA's dataset and, as such, PF is being analyzed separately. At the proposed 0.9 level at 100% of rated load, more than 80% of products in the dataset with 100 watts or more input power can meet the PF criteria, with compliance dropping off under the 100 watts threshold.
