

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460

OFFICE OF  
AIR AND RADIATION

September 24, 2003

Dear Ceiling Fan Manufacturer or Other Interested Party:

EPA is pleased to provide you with the Final ENERGY STAR Version 2.0 Residential Ceiling Fan specification. The attached specification outlines the performance, testing, and labeling requirements that qualifying products must meet in order to bear the ENERGY STAR. Please note that EPA considers this specification to be final and has no further plans to revise it at this time.

On behalf of EPA, I would like to thank everyone that participated in this review process. It is EPA's hope that you will agree that the revision of this specification has been an open process in which industry has been engaged and their opinions heard. All comments will be posted to the ENERGY STAR Web site for review, unless the submitter requested otherwise, along with the Final Version 2.0 specification and revised Qualified Product Information (QPI) form. Partners should use the new QPI form when qualifying products under the new Version 2.0 specification.

Existing partners who wish to continue their partnership in ENERGY STAR for Residential Ceiling Fans will be required to acknowledge the new Version 2.0 specification by updating and submitting the attached Commitment Form. This will require that all products that qualify must meet the requirements of the new Version 2.0 specification, **effective October 1, 2003**.

On behalf of EPA, I appreciate your participation in this revision process and I look forward to working with each of you to ensure a smooth transition to the new Version 2.0 specification. If you have any questions or concerns, please feel free to contact me at [fanara.andrew@epa.gov](mailto:fanara.andrew@epa.gov) or (202) 564-9019.

Respectfully,

A handwritten signature in black ink, appearing to read "Andrew Fanara".

Andrew Fanara  
EPA Program Manager  
ENERGY STAR for Residential Ceiling Fans
