

## **Nebraska State Energy Office Comments on ENERGY STAR Program Requirements for Residential Light Fixtures Draft 2 Eligibility Criteria – Version 4.0**

1. CRI is every bit as, and possibly more, important than temperature and should be listed on both the lamp and the packaging for lamps.
2. I did not see a requirement for low harmonics for ballasts, this should be included for energy star.
3. The brand and model should be included on the packaging, not just the ANSI numbers.
