

**Comments on Draft Final  
Roland DG Corporation  
09/17/2008**

We would like to take this opportunity to state our opinions about the draft final version 1.1 Energy Star Imaging Equipment specification. We wish you will kindly take our requests into your consideration.

1. Qualifying Products: Table 3 – OM Functional Adders

In this table, power-supply (PS) size, based on PS output rating (OR) only applies to products which fall under OM Table 2 and 6. We request to add the OM Table 3 too.

2. Calculating formula for the above mentioned

It has changed from  $0.05 \times (\text{PSOR}-10\text{W})$  to stricter one:  $0.02 \times (\text{PSOR}-10\text{W})$ . We request to keep the original formula.
