Re: Comments on ENERGY STAR® Roof Products Program Draft 1 Version 2.0

Duro-Last Roofing, Inc. respectfully submits the following comments regarding the Draft 1 Version 2.0 ENERGY STAR® Roof Products Program:

The ENERGY STAR® Roof Products Program, as originally designed, has been extremely successful in providing guidance to consumers and encouraging product improvement by manufacturers of roofing products. The ENERGY STAR label is well recognized by consumers and represents products that meet the guidelines established by the U.S. Environmental Protection Agency. As we feel the original guidelines adequately fulfill the purposes of the program, we recommend that the program not be changed from the Version 1.0 specification.

Your consideration of the above comments is greatly appreciated.

Sincerely,

Drew Ballensky
General Manager
Duro-Last Roofing, Inc., Iowa Plant
