Subject: Comments on ENERGY STAR Program Requirements for Residential Ventilation  
Fans - Version 2.1 Final Draft – 12-11-08

I must commend ENERGY STAR for listening to their partners in their response to the comments from the Draft Revision 2 review period. The Final Draft of Version 2.1 of the ENERGY STAR Program Requirements for Residential Ventilation Fans is an excellent document that addresses most of the concerns raised in the review period. Well done.

Broan-NuTone fully supports the Final Draft as published.
