

## ENERGY STAR<sup>®</sup> QUALIFIED PRODUCT INFORMATION FORM FOR RESIDENTIAL VENTILATING FANS

**ENERGY STAR Product Information Form for Use by ENERGY STAR Qualified Residential Ventilating Fan Partners (Companies who have joined ENERGY STAR by signing the Partnership Agreement)** *You may use this form to report only those products that are sold under your company's brand name. If your firm sells its models to another company that uses its own brand name, that company must join the program and report its own products. Information from this form will be added to the list of ENERGY STAR qualified residential ventilating fan products. Please send this form for each qualifying product model to ENERGY STAR, c/o Erin Trager, ICF Consulting, by fax at (202) 862-1144 or email [etrager@icfconsulting.com](mailto:etrager@icfconsulting.com).*

**Company Name:** \_\_\_\_\_  
(As listed in Partnership Agreement)

**Product Contact Information:**  
(for verification of product information)

**Product Type (check one):**

- ☐ Range Hood
- ☐ Bathroom/Utility Room Fan
- ☐ In-line (single-port)
- ☐ In-line (multi-port)

Name: \_\_\_\_\_

Tel: \_\_\_\_\_

Fax: \_\_\_\_\_

Email: \_\_\_\_\_

### I. Qualifying Product Information

| Brand | Model Name | Model Number | Warranty (yrs) | Date Product Available |
|-------|------------|--------------|----------------|------------------------|
|       |            |              |                |                        |

### II. Product Performance

| Airflow (cfm) | Motor Wattage (W) | Efficacy (cfm/W) | Sound level (sones)* |
|---------------|-------------------|------------------|----------------------|
|               |                   |                  |                      |

\* Sound level measurements not required for single and multi-port in-line fans.

**Note:** Ducted bathroom and utility room fans tested at 0.1 w.g. static pressure. Single and multi-port in-line fans tested at 0.2 w.g. static pressure. Non-ducted products tested at 0.3 w.g. static pressure. Range Hoods tested at Working Speed as defined in "HVI Supplement – Range Hood Working Speed."

### Ducted Bathroom and Utility Room Fans Only:

Airflow at 0.25 w.g. static pressure: \_\_\_\_\_ cfm \_\_\_\_\_ % of rated airflow at 0.1 w.g.

### III. Testing and HVI Certification

Tested By: (Name of Independent Testing Firm or Self-Tested) \_\_\_\_\_

Date Tested: \_\_\_\_\_

Is the product in the Home Ventilating Institute Directory (HVI) (circle one)?      Yes      No

If so, under what name? \_\_\_\_\_

### IV. Lighting Requirements

All light sources: please complete the fields provided below (as applicable).

Fluorescent light sources: complete fields and provide data in table below.

Total Number of Lamps Used: \_\_\_\_\_

Maximum Total Listed Lamp Wattage: \_\_\_\_\_ watts

Maximum Total Night Light Wattage: \_\_\_\_\_ watts

| Performance and Reporting Requirements for Fluorescent Sources |                                                                          |
|----------------------------------------------------------------|--------------------------------------------------------------------------|
| Ballast type (check one)                                       | <input type="checkbox"/> Electronic<br><input type="checkbox"/> Magnetic |
| Ballast Manufacturer Name                                      |                                                                          |
| Ballast Model Number                                           |                                                                          |
| Lamp Manufacturer Name                                         |                                                                          |
| Lamp Model Number                                              |                                                                          |
| System Efficacy per Lamp Ballast Combination                   | _____ Lumens                                                             |
|                                                                | _____ Input Watts                                                        |
|                                                                | _____ Lumens/Watt                                                        |
| Lamp Start Time                                                | _____ milliseconds                                                       |
| Lamp Life                                                      | _____ hours                                                              |
| Color Rendering Index                                          | _____ CRI                                                                |
| Correlated Color Temperature                                   | _____ Kelvin                                                             |
| Noise                                                          | _____ dBA                                                                |
| Does lamp ship with the unit (circle one)?                     | Yes      No                                                              |

## V. Labeling Requirements

By checking the boxes below, you are confirming that you have reviewed and will meet the labeling requirements outlined in the ENERGY STAR Program Requirements for Residential Ventilating Fans. These requirements include:

- |                                                                |                                                           |
|----------------------------------------------------------------|-----------------------------------------------------------|
| <input type="checkbox"/> On front/inside of product (required) | <input type="checkbox"/> In product literature (required) |
| <input type="checkbox"/> On product packaging (recommended)    | <input type="checkbox"/> On Internet site (required)      |

If answer to any of the above is no, explain why:
