Subject: Re: ENERGY STAR Windows Criteria Update

I live in Vermont it's cold as hell here! And I see windows, some are Good and some are not so good, I think the standers should be better than what they are. I think that being in the mountains we need the best that's out there. I sell a window that's called galaxy that has the highest insulation- value I can find. And I think every window should be sold as such, instead of price. I think all output should come from some people out in the field.

Thank you for your time.
