

**QUALIFIED PRODUCT INFORMATION FORM
FOR
BOILERS**

ENERGY STAR[®] product information form for use by ENERGY STAR labeled boiler partners. (Companies who have joined ENERGY STAR for boilers by signing a Partnership Agreement)

*You may use this form to report only those products that are sold under your company's brand name. If your firm sells its models to another company that uses its own brand name, that company must join the program and report its own products. Information from this form will be added to the list of ENERGY STAR qualified boiler products. Please complete this form and **fax it back to ENERGY STAR, c/o ICF Consulting, (202) 862-1144 with ATTN: Gwen Duff.** If you need additional space, please copy this form.*

Company Name: _____
(As listed in Partnership Agreement)

Tested by: _____
(Name of Firm or Self-Tested)

Product Contact Information (for public requesting product information)

Name: _____

Tel: _____

Fax: _____

Email: _____

Additions to Qualifying Products List:

Manufacturer Name (Trade Name)	Product Family Name	Type (i.e., Steam or Water)	AFUE Rating	CAafue Rating ¹	Model Series ²

Is product shipped with ENERGY STAR label: _____ in product literature? (*required*) _____ on Internet site? (*required*) _____ on product packaging? (*recommended*)

If answer to any of the above is No, explain why: _____

Please sign below:

Signature: _____

Date: _____

Printed Name: _____

Thank you for your assistance. The Qualifying Products List is available through the ENERGY STAR Hotline (1-888-STAR-YES/1-888-782-7937) and Web site (<http://www.energystar.gov>).

¹ Combination Space-Heating and Water Heating appliances provide both space conditioning (boiler) and hot water heating with one appliance or energy source. The combination appliance circulates hot water from the water heater through a heat exchanger in the air handler. A blower will move the heated air through a standard duct system. In the summer, an air conditioner is connected to the exchanger and the system functions similarly, with cool air being pushed through the ductwork. When the primary heating source of the combined appliance is a residential boiler, the Combined Appliance Annual Fuel Utilization Efficiency ("CAafue") is the same as the AFUE of the boiler as determined by DOE test procedures specified in 10 CFR 430.

² Please simplify model series information when possible (e.g., "All models beginning with...").
