ENERGY STAR®, a U.S. Environmental Protection Agency and U.S. Department of Energy program, helps us all save money and protect our environment through energy efficient products and practices. For more information, visit [www.energystar.gov](http://www.energystar.gov).

## ENERGY STAR Qualified Room Air Cleaners AT A GLANCE

### What is ENERGY STAR?

- The U.S. government-backed symbol of energy efficiency.
- A program dedicated to identifying products that save energy without sacrificing performance.

### Why buy ENERGY STAR qualified room air cleaners?

#### Save energy

- Room air cleaners that have earned the ENERGY STAR are **40%** more energy efficient than standard models, **saving consumers about 340 kilowatt-hours (kWh) per year.**
- Qualified air cleaners **use less energy** to remove particles from indoor air, such as pollen or dust.

#### Save money

- Choosing an ENERGY STAR qualified room air cleaner instead of a standard model can help you **save \$35 annually** on utility bills. These savings could add up to more than **\$330 over the life of the air cleaner!**

#### Save the environment

- By using less energy, qualified air cleaners **reduce greenhouse gas emissions** caused by burning fossil fuels at power plants.
- Since 2004, room air cleaners that have earned the ENERGY STAR have saved nearly 2 billion kWh and prevented about **3 billion pounds of greenhouse gas emissions.**

#### Energy fact

- Since In 2009 alone, American—with the help of ENERGY STAR—**saved \$17 billion on their utility bills** and prevented greenhouse gas emissions equivalent to the annual emissions of 30 million vehicles.

### Additional information for your customers

- A typical room air cleaner, operating continuously, uses approximately 800 kilowatt-hours per year in electricity—**this is about 60% more than the power used by a new refrigerator!**
- Some qualified models offer additional features such as remote control or clock functions.
- Qualified air cleaners must meet energy efficiency requirements based on the electricity used to remove contaminants, such as dust, from the air.

*Please note:* EPA does not endorse any manufacturer claims of healthier indoor air from the use of this product.
