ENERGY STAR®, a U.S. Environmental Protection Agency and U.S. Department of Energy program, helps us all save money and protect our environment through energy efficient products and practices. For more information, visit www.energystar.gov.

ENERGY STAR Qualified Ventilating Fans AT A GLANCE

What is ENERGY STAR?

- The U.S. government-backed symbol for energy efficiency.
- A program dedicated to identifying products that save energy without sacrificing quality or performance.

Why Buy ENERGY STAR Ventilating Fans?

Save energy and money

- Qualified vent fans use more than **70% less energy** than standard models and operate with less noise.
- ENERGY STAR qualified vent fans feature **high-performance motors and improved blade design** for a longer life and better efficiency, helping you save money on your energy bills.

Save the environment

- By using less energy, qualified vent fans **reduce greenhouse gas emissions** caused by burning fossil fuels at power plants.

Energy Fact:

- In 2007 alone, Americans—with the help of ENERGY STAR—saved \$16 billion on their utility bills and prevented greenhouse gas emissions equivalent to the annual emissions of 27 million vehicles.

Share These Tips With Your Customers,

Choosing ENERGY STAR qualified ventilating fans helps keep your home healthy and comfortable, while saving energy.

- Qualified ventilating fans are quieter than standard models.
- Vent fans can remove the moisture that builds up from day to day and help alleviate home moisture problems, such as mold, dust mites, and other pollutants.
- Vent fans remove outdoor odor and pollutants that build up in rooms around the house.
- ENERGY STAR qualified vent fans are available in three different categories to meet your needs: bath and utility, in-line, and kitchen range hoods.
