SUMMARY OF HVAC & SMART THERMOSTAT PROGRAMS

The simple
choice for
energy
efficiency.

AUGUST 2023 UPDATE

This summary provides an overview of Heating Ventilation and Air Conditioning (HVAC) and smart thermostat programs offered by ENERGY STAR utility and other efficiency program sponsors partners in the United States. Both commercial and residential products are covered.

The 2023 Summary of HVAC & Smart Thermostat Programs is based on information submitted to ENERGY STAR for posting on the [ENERGY STAR Rebate Finder](#) and/or the [Database of Incentives and Joint Marketing Exchange](#) (DIME) webpages. ENERGY STAR HVAC and smart thermostat programs are summarized by product type, incentive type (e.g., mail-in rebates, bill credits), and region with historic information since 2019 provided for comparison. Participation in rebate finder and DIME is voluntary and therefore this summary does not represent the entirety of promotions and incentives available across the country. The information in this summary is current as of August 11, 2023; additional information may be available via rebate finder and DIME.

Summary

This summary presents information submitted by 116 energy efficiency program sponsors from across the United States including five umbrella organizations and/or statewide programs running promotions on behalf of 135 cooperative or municipal utilities and investor-owned utilities. Partners provided information on 668 individual incentives/promotions for ENERGY STAR certified commercial and residential heating, ventilation, and air conditioning (HVAC) equipment including smart thermostats.

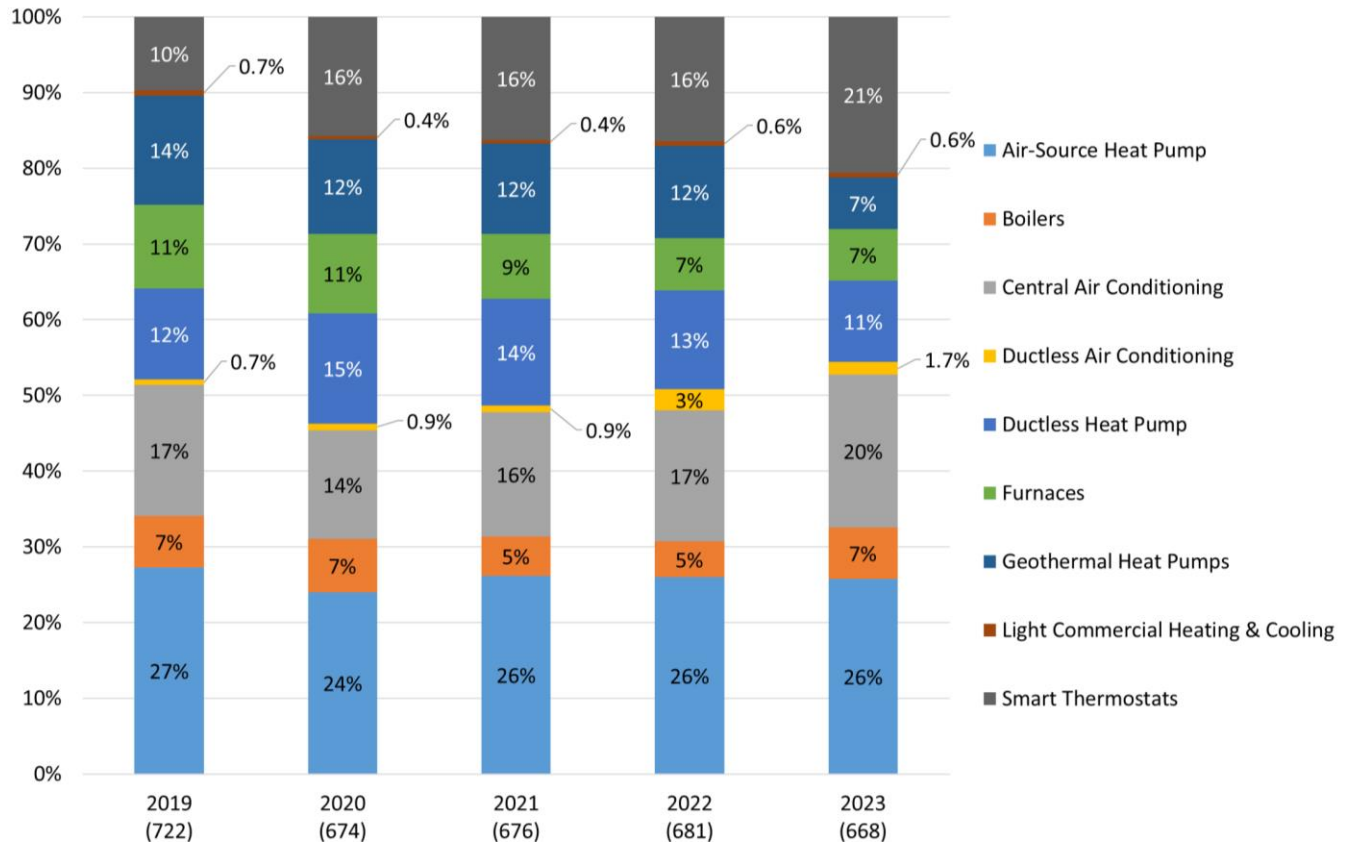

Key observations are provided below:

- Air source heat pumps were the most popular incentive in 2023 with 26% of all HVAC incentives, comparable to the previous four years and had the highest average incentive at \$684.
- Mail-in rebates were the most popular type of incentive comprising 60% of incentives.
- Geothermal heat pumps had the highest increase in average incentive amount (\$569 compared to \$239 in 2022).
- Although the Midwest had the most offerings with 197 incentives, the number of incentives decreased compared to the year prior.
