SUMMARY OF WATER HEATER PROGRAMS

The simple
choice for
energy
efficiency.

AUGUST 2023 UPDATE

This summary provides an overview of water heater programs offered by ENERGY STAR utility and other efficiency program sponsors partners in the United States. Covered products include ENERGY STAR certified gas storage water heaters, heat pump water heaters, tankless gas water heaters, solar water heaters, and commercial water heaters.

The 2023 Summary of Water Heater Programs is based on information submitted to ENERGY STAR for posting on the [ENERGY STAR Rebate Finder](#) and/or the [Database of Incentives and Joint Marketing Exchange](#) (DIME) webpages. ENERGY STAR water heater programs are summarized by product type, incentive type (e.g., mail-in rebates, bill credits), and region with historic information since 2019 provided for comparison. Participation in rebate finder and DIME is voluntary and therefore this summary does not represent the entirety of water heater promotions and incentives available across the country. The information in this summary is current as of August 11, 2023; additional information may be available via rebate finder and DIME.

Summary

This summary presents information submitted by 101 energy efficiency program sponsors from across the United States including three umbrella organizations and/or statewide programs running promotions on behalf of 88 cooperative or municipal utilities. Partners provided information on 304 individual incentives/promotions for ENERGY STAR certified water heaters including gas storage water heaters, heat pump water heaters, tankless gas water heaters, solar water heaters, and commercial water heaters.

Key observations are provided below.

- The majority of incentives (65%) were for heat pump water heaters. The overall number of water heater incentives increased from 224 in 2022 to 304.
- More than half of incentives (52%) are mail-in rebates.
- Continuing a five year trend, the highest average incentive amount was for solar water heaters at \$1778, a slight decrease from last year's average.
- The West had the highest number of incentives at 72, with the Midwest a close second at 68 incentives. In the Northeast, about 29% of incentives were for gas storage water heaters, more than double any other region.
