| <b>Thermostat Brand Name:</b>                           | Vive  |
| <b>Thermostat Model Name:</b>                           | TP-S-701i   |
| <b>Thermostat Model Number:</b>                         | TP-S-701i   |
| <b>Standby Power (W):</b>                               | 0.46  |
| <b>Thermostat Heating and Cooling Control Features:</b> | Time of Day Usage   |
| <b>Thermostat Communication Method:</b>                 | Wi-Fi   |
| <b>Demand Response Summary:</b>                         | The Pro1 implementation of OpenADR 2.0b allows enrolled customers to participate in load shedding events. Events can target specific devices via a variety of parameters including enrollment status and zip code. Upon receiving an event signal, the connected thermostat provides customers options on how it should respond. Options include accepting/denying the load shedding event. Work is in progress to fully comply with capabilities listed in CEC Title 24, Part 6. |
