Subject: Energy Star use in commercial projects

To whom it may concern:

We are writing this letter as a matter of concern regarding the discontinuation of the Energy Star program for commercial products.

As consultants and specifiers of audiovisual projects across numerous vertical markets, including higher education, workplace, bio-med, civic and others, we have increasingly seen that sustainable design is a part of the mission for the organizations for which we serve.

When clients ask how we can help them use technology in the most sustainable manner, we often point to our ability to specify equipment with the Energy Star logo, such as manufactured by Extron.

We would greatly miss the opportunity for specifying Energy Star equipment if this program is discontinued. We hope that you give the further consideration and will continue this program.

If you have any additional questions please do not hesitate to contact me 650-619-0958

Best,

SALTER

Ken Graven, PE, RCDD, CTS-D
